The Study of 18th and	CO2: The students analyze and appreciate the 18 and 19 century
19th Century English	literature.
Literature	CO3: The students critically examine the works agonist the
	historical background and the find out the elements and aspects of
	the poetry, drama and novel of 18 and 19century.
SEC 1& 2 – Skill based	CO1: Students acquire English language abilities necessary in the
paper	competitive examinations
	CO2: The comprehension ability of the students increase.

Class: T.Y.B.A.		
	CO1: The students read with understanding and respond to the	
Comp. English- AEC: Developing	problems based on texts.	
	CO2: The students perfects in Group discussion, public Speaking	
	and Interviews.	
Communication Skills	CO3: The students understand the use of language through literature	
	and reproduce it.	
	CO1: The students understand the genre of drama with its origin and	
	development.	
DSC English GII	CO2: The students read the drama and understand all the aspects	
Indian Writing in English	and elements of drama.	
	CO3: The students study the drama practically and can critically	
	appreciate it.	
	CO1: The students know and study the Indian/American novel and	
DSE 3 A& B - SIII	drama in English.	
:Twentieth Century	CO2: He gets acquainted with the origin and development of	
English Literature	Indian/American Creative Prose and Dramatic writings.	
	CO3: He students Indian novels and dramas and critically analyze	
	and appreciate.	
	CO1: The students understand the origin and development of	
	language.	
English SIV DSE 4 A & B	CO2: They learn sounds in English and they are trained to	
The Study of English	pronounce the sounds and words correctly.	
Language	CO3: The students are aware of word formation and develop their	
	ability to use the words properly by studying semantic and syntactic	
	features.	
	CO1. The students leave English years	
SEC ENC. English for	CO1: The students learn English usages CO2: They use English usages in day to day life.	
SEC ENG: English for		
Practical Purposes 3 & 4	CO3: They learn the hard and soft skills necessary for the job attainment.	
	attainment.	
	CO1: Students understand the various genres of arts.	
	CO2: They understand the similarities and dissimilarities between	
	films and novel/drama as genres	
Generic Elective Course GE-1(A and B) GE Eng A and B: Film	CO3: They acquire the knowledge of adaptation from a work of	
	literature into films.	
	CO4: They can analyze film adaptation of literary text.	
and Literature	201. They can analyze thin adaptation of ficially text.	
	CO5: They comprehend and appreciate the novels, drama, short	
	story and movies.	
	owing and movies.	

Class: F. Y. B. A.	
	CO1: Students find the location and extent of a region using
	graticule.
	CO2: Understand the composition the earth and distribution of the
	continents and oceans.
	CO3: Students identify the characteristics of various rocks and
	explain the process of weathering.
Gg101 (DSC A -1) –	CO4: Explain the formation of various geographical features
PHYSICAL	CO5: Explain the structure and composition of the atmosphere.
GEOGRAPHY	CO 6: Elaborate the causes of uneven distribution of insolation and
	temperature.
	CO7: Understand the pressure belts and global as well as local wind
	system.
	CO8: Explain the forms of condensation and types of precipitation.
	CO9: Understand the structure of ocean floor and mechanism of
	ocean currents.
	Class: S. Y. B. A.
	CO1: To develop and communicate basic conceptual frame work of
	Geo Tourism.
	CO2: To realize its potentials and against achieved in the Indian
Gg. 232 (DSE 1 A):	context.
GEOGRAPHY OF	CO3: To understand the various Geo tourism.
TOURISM	CO4: To know the role and responsibilities, economic growth of
TOOKISIVI	Tourism industry in India.
	CO5: To evaluate the role of various organization of tourism.
	CO6: To know the importance of the sustainable tourism.
	CO7: To develop Socio cultural aspects for the Tourism geography.
	CO7. To develop socio cultural aspects for the Tourishi geography.
	CO1: To make the students able to understand Geographical
	Personality of India.
	CO2: To study minerals and power resources in the specific regions
Gg. 242 (DSE 1 B):	of India.
GEOGRAPHY OF INDIA	CO3: To study the nature of industries and their development in
GEOGRAFIII OF INDIA	India.
	CO4: To aware the students about agricultural and demographic
	problems and make them able to find remedial measures on those
	problems.
	problems.
Gg. 233 (DSE 2):	CO1: To give basic information about various tools and techniques
PRACTICAL	used in making maps.
TRACTICAL	used in making maps.

GEOGRAPHY	CO2: To understand the concept of scale at the initial stage and
	enable know the scale and distance of surveying.
	CO3: To know how to draw the maps on various scale hence
	acquaint the students with basic of Scale, Map Projections and
	cartographic Techniques
	CO4: To enable the students to use Scale, Map Projections and
	cartographic techniques to acquire knowledge of survey language
	and sense of technique of surveying.
	CO5: To know how to draw layout by surveying of region. to
	acquaint the students with basic
	Knowledge and technique of ground survey.
	CO6: To acquire the knowledge of survey instruments to provide
	basic information about Mechanism of survey instruments.
	CO7: To acquaint the knowledge how to use survey instruments and
	the importance of surveying and survey instruments.
	CO1: Student will become well aware about the Regional Planning
	and Development.
Gg. 234 (SEC 1):	CO2: Students will get the knowledge of planning, its limitation.
REGIONAL PLANNING	CO3: Students will be able to participate in planning and regional
AND DEVELOPMENT	development.
	CO4: Students will get knowledge about various approaches and
	models of regional planning and development.
	CO5: Students will be aware of the Special area development plans
	and argo Ecological Zones of Maharashtra.
	CO1: To understand the principles of Remote Sensing.
Gg. 244 (SEC 2):	CO2: To acquaint the students with fundamental concepts of Aerial
REMOTE SENSING AND	Photography.
GPS BASED PROJECT	CO3: To introduce students with advance techniques for data
REPORT	collection.
	CO5: To learn basics of CPS based survey.
	CO5: To learn basics of GPS based survey.
	CO1: To motivate the students towards Research.
Cg. 245 (DCC 2D).	
Gg. 245 (DSC 3D): MINOR STUDY	CO2: To understand the various problems in the field of Geography.
PROJECT	CO3: To introduce research methodology and to inculcate research
I ROJEC I	aptitude. CO4: To enhance analytical thinking and report writing ability of
	the students.
	the students.
	Class -T. Y. B. A.
Gg. 351 (DSC 1E)	CO1: To create the environmental awareness amongst the students.

Environmental Geography	CO2: To acquaint the students with fundamental concepts of	
	Environmental Geography.	
	CO3: To aware the students about the processes and patterns in the	
	natural environment.	
	CO4: To acquaint the students with potentials of Environmental	
	Geography.	
	CO5: To aware the students about use of resources with prudence.	
	CO6: To acquaint the students with different environmental policies.	
	CO1: To acquaint the students with the knowledge of economic	
Gg. 352 (DSE 3A)	realm in the world.	
Economic Geography	CO2: To highlight the different economic activities.	
	CO3: To study mineral and power resources in the specific regions	
	of the world.	
	CO1: To introduce the practical approach of Human Geography.	
	CO2: To introduce the importance of statistical techniques in	
	Human Geography.	
Gg. 353 (DSE) Practical	CO3: To introduce some basic research methods to the students.	
Geography	CO4: To introduce the students with Survey of India's toposheets	
Geography	•	
	and to acquire the knowledge of interpretation.	
	CO5: To acquaint the students with Indian Meteorological	
	Department's weather maps and to gain the knowledge of weather	
	Map interpretation.	
	I act m : 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	
	CO1: To introduce the analytical skill of field-work.	
Gg. 354(SEC 3) Field	CO2: To develop the skill of selection of appropriate technique for	
Techniques and	field study.	
Introduction to Project	CO3: To enable the student to frame different types of	
Report.	questionnaires to conduct a field study.	
	CO4: To develop the analytical interpretation and report writing	
	based upon the data collected during a field study.	
Ca 255 (CE 1A) Diagram	CO1: To introduce the concept of disaster risk.	
Gg. 355 (GE 1A) Disaster	CO2: To prepare DRM Plans and its implementation.	
Risk Reduction.	CO3: To aware the students about the Disaster Risk	
	Reduction/Mitigation strategies.	
	CO1: Understand the components of population change.	
Gg. 361 (DSC 1F)	CO2: Develop skills to use population information in the planning	
Population Geography.	process.	
i opulation Geography.	CO3: Understand the impact of planning activities on population	
	size, composition, and distribution	

	CO4: Population is an important resource. The development of any
	nation is depending on human resource. It is a prime deity to
	acquaint with the human resource of the nation.
	CO5: To understand the recent problems of population in the world
	as well as nation.
	CO1: To enable students to acquire knowledge of Political
Gg.362 (DSE 3B) Political	Geography
Geography	CO2: To understand basic concepts of Political Geography.
	CO3: To study various theories of Political Geography.
	CO4: To understand the frontiers and Boundaries.
G 264 (SEC.A)	CO1: To introduce the fundamentals and components of Geographic
Gg. 364 (SEC 4) Geographical Information	Information System
	CO2: To provide details of spatial data structures and input,
System.	management and output processes.
	CO3: To aware about the application of GIS in various fields.
	•
	CO1: It brings to attention the students about the issues which
Gg. 365 (GE 1B):	surround Sustainable Development, including its Principles,
SUSTAINABILITY AND	Processes and Concepts, its Deciding factors, and Potentials it holds.
DEVELOPMENT	CO2: Students will get the information and Importance of the
	MDGS.
	CO3: Students will be aware about National Environmental Policy.

Adjustment in Life Span	faster than others
Javennene in mile opini	
	CO1: Develop a working knowledge of Psychological contents, areas
Psy - 101 Basic Principles	and applications of psychology.
in Psychology	CO2: Develop a base in cognitive psychology with the help of relevant
	examples of everyday life.

	CO3: Comprehend and analyze situations in real life appropriately and enable others to exercise in the same way.
	Appreciate and apply various theories of learning in the practical world.
	Identify the importance of experiments in the field of memory and other cognitive aspects and analyze the way it shaped cognitive psychology
Psy - 201 Fundamental Concepts of Psychology	CO1: Understanding and application of psychological principles, theories and methods of different psychological areas (like learning, memory, etc.) to understand the complexity of human behaviour. CO2: Knowledge of the fundamental physiological functional mechanism behind the Nervous system in the human body. CO3: It also correlates to the understanding of historical context of different studies and researches.

	S.Y.BCA
	CO1: Understanding of all terms related to mathematical logic.
	CO2: Ability to know the types of sets, method of
	representation, operations, and laws related to it.
BCA 301	CO3: Ability to solve problems related to matrices.
Mathematics and Statistics for	CO4: Understand the basic concepts of Statistics.
Managers	CO5: Analyze statistical data using measures of central
Managers	tendency.
	CO6: Performing mathematical and statistical functions using
	MS-Excel.
DC4 202	MS-Excel.
BCA 302	
Management Information	CO1: To impart the knowledge of MIS among students
System	
	CO1 T 1 1' + 1 1'
	CO1: To apply object oriented programming
BCA 303	features and concepts for solving givenproblem.
Java Programming	CO2: Develop reusable programs using the concepts
	of inheritance, polymorphism, interfaces and packages.
	CO3: To develop simple interactive applications.
	CO1: To get aware of the main components, computer
BCA 304	organization interface, and system calls of OS.
Linux Operating System	CO2: Ability to apply process management and threading.
Emax operating system	CO3: To Make understand the features of Linux OS
	CO4: To Learn the basic Linux command
BCA 305	CO1: To understand basics of Java Programming.
Practical on Java	CO2: Implement different applications using Java.
BCA 306	CO1: Apply Linux operating system commands.
Practical on Linux	CO2: Understand different Linux shell scripts and execute
Tractical on Linux	various shell programs.
BCA 307	CO1: To practically train students in Accounting using Tally
Practical on Tally ERP	ERP
BCA 401	COL. To import the knowledge and importance of Information
Introduction to Information	CO1: To impart the knowledge and importance of Information
intivated to information	Createns and Aridit amore Ct. d. F C. 17 M.
System Audit	System and Audit among Students for Quality Management.
	System and Audit among Students for Quality Management.

RDBMS	databases and its applications
1021,15	authorized and the appropriate
BCA 403	CO1: To impart the knowledge of object oriented programming
C#.NET	using C# among student.
0	1
	CO1: To analyse algorithms and algorithm correctness.
BCA 404	CO2: To summarize searching and sorting techniques.
Data Structure	CO3: To describe stack, queue and linked list operation.
	CO4: To have knowledge of tree and graphs concepts.
	T.Y.BCA(2017-18)
BCA 501	
Entrepreneurship	CO1: Learn about Entrepreneurship Development
Development	Solve South Security Solve Sol
	1
BCA 502	CO1: To impart the knowledge of Cybercrime and cyber
Cyber Security	security among students.
, , ,	, ,
	CO1: Design Web application / Website using ASP.NET and
	.NET Framework.
	CO2: Use ASP.NET controls in web applications
BCA 503	CO3: Create event driven ASP.NET web application.
ASP.NET	CO4: State Management for user and application data.
	CO5: Create web application to manage data from data base
	using ADO.NET.
	CO1: To design and develop a software in learned language.
BCA 504	CO2: To prepare software requirement specification.
Software Engineering	CO3: Estimate the size and cost of software product.
	CO4: Get knowledge of different types of software testing
	CO1: Use .NET IDE for ASP.NET web application
	development and form developmentusing standard
	.NET Controls.
BCA 505	CO2: Develop web application handling different events.
Practical on ASP.Net	CO3: Use validation controls for validating page data.
	CO4: Create and use master page, apply theme and skin for web
	pages.
	CO5: Develop web applications using data from database.
BCA 506	
Practical on CASE Tool with	CO1: practically train students in using CASE tools for
MS- VISIO and Software	designing real time system diagrams.
Testing	

BCA 507	
Field work on IT Project	CO1: Students will understand the issues in implemented IT
Assessment	project by assessing it using research methodology.
BCA 601	CO1: To impart the knowledge of e-Commerce & m -
E-Commerce & M-Commerce	Commerce among students.
	,
BCA 602	CO1: This course will help the students to get familiar with
Cloud Computing	cloud computing fundamentals, architecture, services,
	implementation and deployment techniques etc
BCA 603	CO1: to know that how mobile communication works and how
Android Application	to build mobile apps for android operating system.
Development	CO2: To understand mobile communication and to develop
	Android Applications.
	T
	CO1: Design Web applications / Website using HTML and
BCA 604	PHP.
Server Side Scripting using	CO2: Use PHP script with functions, Arrays, and Strings in web
PHP	applications.
	CO3: Use Forms and Handle Files using PHP Script.
	CO4: Create web applications using MySQL database.
	COL Design web site / web and leasting wains HTM and DID
	CO1: Design web site / web applications using HTM and PHP
BCA 605	script CO2: File and directory handling using DUD for year
Practical on Android &PHP	CO2: File and directory handling using PHP for web
	applications.
	CO3: Create web application using MySQL database.
BCA 606	
Practical on Employability	CO1: To practically train students in developing required
Skills	employability skills
BCA 607	CO1: Learn to use applications of the theory and practical
Project Report and Viva	learned during the course and prepare the project.
- roject report and , r,u	The property of the property of the project.

Class: F. Y. B.Com	
	CO1: To introduce communication theory to students.
101	CO2: To inculcate various communication skills in English among students.
	CO3: To introduce various soft skills to students.
English for Business	CO4: To improve oral and written competency in English of students.
	CO1: To introduce various famous entrepreneurs to commerce students.
103	CO2: To develop Hindi reading and linguistic comprehension of students
102	CO3: To improve professional and entrepreneurial attitude of students
Hindi	through success stories.
	CO4: To Acquaint Students with special challenges of starting new ventures
103	CO1: To introduce Microeconomics
	CO2: To develop Indifference Carve Analysis of Demand
Micro Economics	CO3: To develop Theory of Production
	COS. To develop Theory of Froduction
104	CO1: To lay a foundation for understanding the Accounting
104	Standards issued by the ICAI.
Financial	CO2: To gain the ability to solve problems relating to settlement of
Accounting and	obligations on dissolution of partnership firm and also relating
	to their business combinations
Costing	CO3: To introduce the concepts used in Cost Accounting, elements
	of costs and the concept of cost sheet.
	CO1: To familiarize the Students with basics of Internet.
105	CO2: To understand the use of Office application.
	CO3: To know the role of word processor, Spread sheet, presentation in
Computing Skills	industry.
	CO4: To understand the how of accounting software works.
107	CO1: To understand the concept of office management.
106	CO2: To know the secretarial procedure.
Modern office	CO3: To acquire operational skills of office management.
Management	CO4: To develop the interest in methods and procedures of office
g	management.
107	CO1: To understand the concept of Banking.
Principles &	CO2: To know the Banking procedure.
Practices of Banking	CO3: To develop the interest in methods and procedures of Banking.
201	CO1: To improve oral and written competency in English of students.
	CO2: To introduce communication theory to students.
English for Business	CO3: To inculcate various communication skills in English among students.
	200. To medicate various communication skins in English among students.

	CO4 T
	CO4: To introduce various soft skills to students.
	COL. To introduce verience for one articles
202	CO1: To introduce various famous entrepreneurs to commerce students.
202	CO2: To Acquaint Students with special challenges of starting new ventures
Hindi	CO3: To develop Hindi reading and linguistic comprehension of students.
	CO4: To improve professional and entrepreneurial attitude of students
	through success stories.
202	CO1 T 1 + 1C + CM 1 +
203	CO1: To understand Concept of Market
Micro Economics	CO2: To Study of Market of Perfect Competition
	CO3:To develop students for MPSC and UPSC Exams
	CO1: To lay down a theoretical foundation for the recording of
204	financial transactions concerning specialized area related to
Financial	non-corporate entities and for preparing the related accounts
	or statements.
Accounting and	CO2: To lay a foundation for the preparations of financial
Costing	statements from incomplete record.
5 5 2 1 5	CO3: To lay a foundation for understanding the Accounting
	procedure for Material cost and price methods.
-07	T
205	CO1: To develop and employ mathematical models
Quantitative	1 1 3
_	CO2: To develop and employ mathematical, theories
Techniques	CO2. To develop and employ mathematical, theories

607	CO1: To Impart the students, knowledge about accounting treatment of
	corporate undertakings restructuring.
Advanced	CO2: To apprise the students about the application of accounting knowledge in preparation of financial statements of Bank Accounts.
Accounting-II	CO3: To appraise the students about the application of accounting knowledge
	in reading and interpreting the financial statements of corporate entities.
	in reading and interpreting the infancial statements of corporate entities.

	CO1: To Obtain an understanding of various types pricing methods and
	procedures
101	CO2: To Understand the preparation of the profile of a project.
101	CO3: To appraise the students about application of the AS concerning the
Economics Of	aspects in accounting.
Industries-I	CO4: To Obtain a theoretical understanding of Price Wars and Non-price
industries-i	competition, Industrial finance
	and productivity
	CO1: To know and understand main concepts & level of Strategic
	Management.
102	CO2: To know the modern techniques concepts of strategic control and
102	evaluation.
Strategic	CO3: To understand co-operate level strategies in the competitive situation.
Management	CO4: To understand co-operate level strategies in the competitive situation
	and productivity
	una productity
	CO1: To study Research Methodology for decision making in business
103	CO2: To overview the methods of Data Collection
Research	CO3: To understand process of research by students for preparation of
Methodology	research report.
	research report.
	CO1: Understand elementary knowledge about Accounting Standard
	CO2: Understand different aspects of Value Added Statement and Reporting
104	CO3: 3 Understand the advanced aspects of accounting relating to company
Advanced	liquidation, Holding
Accountancy	company
recountaincy	CO4: Understand the method of presenting financial statements by
	Insurance companies
	1 modiumee companies
	CO1: To study the basic concepts of Industrialization
201	CO2: To study the performance and problems of Indian Industry
Economics Of	CO3: To study the performance and problems of indian industry
Industries-Ii	CO3: To study the government regulation of firm and industry CO4: To study the impact of industrialization on Indian Economy
	1004. To study the impact of industrialization on indian economy
202	CO1. To various data different anxions at afficiency in
202	CO1: To understand the different environment of business organization
Case Studies In	through practical cases
Strategic	CO2: To solve the situational problem and understand the importance
Management	CO3: To observe real life situation through cases
	001 T 1 4 14 4 1T 4 1T 1 1 1 1 1 1 1 1 1 1
203	CO1: To understand the concept and International Business.
International	CO2: To know the International Business Environment.
Business	CO3: To study the India's International Business.
20111000	CO4: To know the concept of Foreign Collaboration and Joint Venture.

	CO1: To understand the nature of cost accounting records maintained by
	manufacturing companies.
204	CO2: To figure out how to reconcile Cost and Financial Accounts.
Advanced Cost	CO3: To know the legal requirements regarding maintaining the cost
Accountancy	accounting records and audit thereof
	CO4: To enable students to gain knowledge the nature of Cost Information
	System for presenting the cost data to the management.
	CO1: Understand the philosophy and rationale of the financial analysis
	CO2: Understand the techniques of analysis and interpretation of financial
301	statements
	CO3: Develop an appreciation about the utility of techniques of financial
Management	analysis for management information
Accounting	and decision making process.
	CO4: Evaluate the implications of cash flow and fund flow on financial
	position of an industrial organisation.
	CO1: To encourage and inspire the students to become an Entrepreneur
302	CO2: To acquaint the students with the challenges to start a new venture
Entrepreneurship	CO3: To provide theoretical foundation for executing various projects.
Management	CO4: To highlight the support system for Entrepreneurship Management
n ng	20 1. To highlight the support system for Entrepreheurship Management
	CO1: To get an overview of organizational behaviour and the challenges and
	opportunities.
303	CO2: To understand the concept of behaviour – individual and
Organizational	Organizational Behaviour.
Behavior	CO3: To know about perception, learning, attitude, values and emotions.
Denavior	CO4: To gain knowledge of Motivation and Leadership and its various
	theories
	COLUMN AND A COLUM
	CO2: Understand basic knowledge about Accounting Standard
304	CO2: Understand the basics of Price Level Change, like Inflation
Advanced	Accounting, etc
Accountancy	CO3: Understand the advanced aspects of accounting for Lease
•	CO4: Understand the method of presenting Financial Statement of Credit
	Cooperative Societies
	CO1. Understand the concept and techniques of financial control used in
	CO1: Understand the concept and techniques of financial control used in
401	management accounting CO2: Imbibe knowledge about the control techniques namely budgetary
401 Management	CO2: Imbibe knowledge about the control techniques namely budgetary control and standard costing.
Accounting	CO3: Develop the skill to analyze the cost-variance for effective cost control.
Accounting	CO3: Develop the skill to analyze the cost-variance for effective cost control. CO4: Familiarize with the concept, role, and utility of marginal costing, and
	its implications and utility for
	110 Improduono dud dunty 101

	managerial decision making process
402 Modern Retail Management	CO1: To understand dynamics of modern organized retail trade CO2: To overview Retail Development in India and Modern Retail Format CO3: To understand the Merchandise Management and Retail Franchising CO4: To know the Application of Information Technology in Retailing
403 Information Systems For Business	CO1: Develop conceptual understanding about latest developments in the field of Information Technology and the impact of I.T. in Managing business. CO2: Learn to use Information Technology to gain competitive advantage in business CO3: Develop students as Cyber Security experts, ERP domain experts and Data Analysts CO1: Develop conceptual understanding about latest developments in the field of Information Technology and the impact of I.T. in Managing a Business.
404 Advanced Accountancy	CO1: Know audit skills required for audit of Banks and Co-operative Societies CO2: Understand the legal framework governing the audit of various forms of business entities and non-business entities CO3: Understand the proper way of making examination of the financial statements of various business entities, and form opinion thereon CO4: Understand the way of auditing of different units of service sector

UG – BMS (e-Com)

Class: - FYBMS (e-Com) SEM-I (2017-18)

	CO1. To see 1 contact 1 from 1 contact 1
E 1.1 Principles of	CO1: To understand fundamental concepts Management.
Management	CO2: To understand the basics of Management.
	CO3: To understand management ethics
	CO1: To develop his verbal and nonverbal communication ability
E 1.2–Professional	CO2: To communicate with people effectively and confidently.
Communication I	CO3: To draft effective business correspondence documents.
	CO4: To make and present well designed and informative
	presentations
	CO1: Acquire the knowledge of fundamentals of Computer and
E 1.3 Fundamentals of	Operating System.
	CO2: Develop problem solving skill through algorithms and
Accounting	flowcharts.
	CO3: Understand the basics of computer networking and internet.
	CO1: Acquire the knowledge of fundamentals of Computer and
E 1.4 Fundamentals of	Operating System.
	CO2: Develop problem solving skill through algorithms and
Computer & Internet	flowcharts.
	CO3: Understand the basics of computer networking and internet.
	CO1: Acquainted with elements, Tags and basic structure of HTML
	files.
E 1 5 C Due anamain a	CO2: Up skills the knowledge of basic and advanced web designing.
E 1.5 C-Programming	CO3: Students were implement effective use of List and Tables.
	CO4: Students were implement effective web page navigation.
	CO5: Students were capable to design web page layout
	
	CO1: Students understand the input output functions.
F 1 (Day of the C	CO2: Students can understand the use of various operator.
E 1.6 Practical on C	CO3: Students can understand the use of control statements.
Programming	CO4: Students can design the various expressions in C
	CO5: Students can understand the array and its type.
	CO1: Students can able to understand the installation of operating
E 1.7 Practical on Office	system.
Automation	
TAMOOTHUUT	CO2: Students can understand basic DOS command, and different
	browser.

CO3: Student understand different platforms, Internet, mails, tables
CO4: Students can learn text formatting and table formatting.
CO5: Students capable to design power point presentation, tables,
shapes, smart arts and charts

Class:- FYBMS(e-Com) SEM-II

E 2.1 Introduction to	CO1: To understand the basics of Organization
Organization Behavior	CO2: To understand Interpersonal Relationship among the
	organization units
	CO1: To communicate with people effectively and confidently.
E2.2 Professional	CO2: To draft effective business correspondence documents.
Communication II	CO3: To make and present well designed and informative
	presentations
E 4 2 E'	CO1: Acquire the knowledge of fundamentals of Computer and
E 2.3 Financial	Operating System. CO2: Develop problem solving skill through algorithms and
Accounting & Costing	flowcharts.
	CO3: Understand the basics of computer networking and internet.
	CO4: Understand the basics of Costing.
E 2.4 Elements of E-	CO1: To impart the knowledge of e-Commerce among students.
Commerce	CO2: To impart the knowledge of m - Commerce among students.
E 2.5 Programming in	CO1: Acquainted with elements, Tags and basic structure of HTML files.
	CO2: Up skills the knowledge of basic and advanced web designing.
C++	CO3: Students were implement effective use of List and Tables. CO4: Students were implement effective web page navigation.
	CO5: Students were capable to design web page layout
	CO1: Solve real time problems and isolate and fix common errors in
	C++ programs
E 2.6 Practical on C++	CO2: Understand the object-oriented approach for the program
programming	development and make use of the OOP concepts (data abstraction,
	encapsulation, polymorphism, overloading, and inheritance) of C++
	appropriately in problem solving.

E 2.7 Practical on Tally	COL To mustically train students in Assessment young Tally EDD
ERP	CO1: To practically train students in Accounting using Tally ERP

SYBMS(e-Com) SEM-III

E 3.1	CO1: Understanding of all terms related to mathematical logic. CO2: Ability to know the types of sets, method of representation,
Mathematics & Statistics for Managers	operations, and laws related to it.
	CO3: Ability to solve problems related to matrices.
	CO4: Understand the basic concepts of Statistics.
	CO5: Analyze statistical data using measures of central tendency.
E 3.2 Business Economics	CO1: To understand Nature and Scope of Business Economic.
	CO2: To understand Production Cost and Revenue concepts
E3.3 Business Ethics &	CO1: To understand Business Ethics
Professional Values	CO2: To understand Organizational Ethics
1 1 0 1 0 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	
	CO1: Acquainted with elements, Tags and basic structure of HTML
	files.
E 2 4 W D ' '	CO2: Up skills the knowledge of basic and advanced web designing.
E 3.4 Web Designing Using HTML and CSS	CO3: Students were implement effective use of List and Tables.
	CO4: Students were implement effective web page navigation.
	CO5: Students were capable to design web page layout
	CO6: Students were understood and implement use of style sheet.
	CO1: To apply object oriented programming features
	and concepts for solving givenproblem.
	CO2: Develop reusable programs using the concepts of
	inheritance, polymorphism, interfaces and packages.
E 3.5 Java Programming	CO3: To develop simple interactive applications.
	CO1: To apply object oriented programming features
	and concepts for solving givenproblem.
	CO2: Develop reusable programs using the concepts of
	inheritance, polymorphism, interfaces and packages.
	, polymorphoni, meriaces and packages.
E 3.6 Practical on Java	CO1: To understand basics of Java Programming.
Programming	CO2: Implement different applications using Java.
	CO2. Implement different applications using Java.

	CO1: Students were able to design consistent look and feel web pages.
E 3.7 Practical on HTML	CO2: Students were capable to use multimedia in web page.
& CSS	CO3: Students were implement effective web page navigation.
	CO4: Students were capable to design web page layout
	CO5: Students were implement use of style sheet.

Class:- SYBMS(e-Com) SEM-IV

E 4.1 Management	CO1: To impart the knowledge of MIS among students
Information System	CO2: To understand hierarchy and structure of Management
E 4.2 Research	CO1: To impart the knowledge of Basic Concepts of Research
E 4.2 Research	CO2: To impart the knowledge of Methods of data collection, Tools
Methodology	of Data Analysis
	CO3: To impart the knowledge of Testing of Hypothesis
E 4.3 Cyber Security and	CO1: To impart the knowledge of Cybercrime and cyber security
E 4.3 Cyber Security and	among students.
IT Act	CO2: To impart the knowledge of Cybercrime laws among
	students.
E 4.4 RDBMS	CO1: To prepare students in using and managing Relational
	databases and its applications
E 4.5 Programming in	CO1: To impart the knowledge of object oriented programming
C#.NET	using C# among student.
E 4.6 Practical on C#.Net	CO1: To practically train students in programming in C#.NET
E 4.7 Practical on RDBMS	CO1: To learn SQL Queries

Class:- TYBMS(e-Com) SEM-V

E 5.1 Entrepreneurship	
Development	CO1: Learn about Entrepreneurship Development
	<u> </u>
E COM I d'	CO1: To understand basics of marketing
E 5.2 Marketing	CO2: To understand basics of Marketing Environment and
Management	Marketing Research, Segmentation CO3: To understand basics of Digital Marketing
	CO3. To understand basics of Digital Marketing
	CO1: Design Web applications / Website using HTML and PHP.
E 5.3 Introduction to	CO2: Use PHP script with functions, Arrays, and Strings in web
scripting languages	applications.
	CO3: Use Forms and Handle Files using PHP Script.
	CO1: To design and develop software in learned language.
E 5.4 System Analysis And	CO2: To prepare software requirement specification.
Design	CO3: Estimate the size and cost of software product.
	CO4: Get knowledge of different types of software testing
	CO1: Use .NET IDE for ASP.NET web application
	development and form developmentusing standard .NET
	Controls.
E 5.5 Web Programming	CO2: Develop web application handling different events.
with ASP.NET	CO3: Use validation controls for validating page data.
	CO4: Create and use master page, apply theme and skin for web
	pages.
	CO5: Develop web applications using data from database.
	2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2
	CO1: Design Web application / Website using ASP.NET and .NET
	Framework.
E 5.6 Practical on	CO2: Use ASP.NET controls in web applications
ASP.NET	CO3: Create event driven ASP.NET web application.
	CO4: State Management for user and application data.
	COT. State Management for user and application data.

	CO5: Create web application to manage data from data base using ADO.NET.
E 5.7 Practical on	CO1: Design web site / web applications using HTM and PHP script
Scripting Language	CO2: File and directory handling using PHP for web applications.
	CO3: Create web application using MySQL database.

Class:- TYBMS(e-Com) SEM-V

E 6.1 Introduction to	CO1: To understand Introduction to Banking, Nature of Insurance	
Banking and Insurance	and Bank Management CO1: To understand Co-operative Banking	
	CO1. To understand Co-operative Banking	
E 6.2 Human Resource	CO1: To understand Introduction to Human Resource Management and Recruitment, Selection, Placement & Induction	
Management	CO1: To understand Performance Appraisal, Promotion, Transfer,	
	Separation and Demotion	
E 6.3 Introduction to		
	CO1: To impart the knowledge and importance of Information	
Information System Audit	System and Audit among Students for Quality Management.	
T (A T)		
E 6.4 Enterprise Resource	CO1: To train students in basics of ERP	
Planning	CO2: To understand needs of Enterprise	
	CO1: Design Web applications / Website using HTML and PHP.	
E 6.5 DIID Sovinting and	CO2: Use PHP script with functions, Arrays, and Strings in web	
E 6.5 - PHP Scripting and MySQL	applications.	
	CO3: Use Forms and Handle Files using PHP Script.	
	CO4: Create web applications using MySQL database.	
E 6.6 – Practical on PHP	CO1: Design web site / web applications using HTM and PHP script	
and MySQL	CO2: File and directory handling using PHP for web applications.	
• -	CO3: Create web application using MySQL database.	
E (7 Duoing Westle	CO1: Learn to use applications of the theory and practical learned	
E 6.7 – Project Work	during the course and prepare the project	

Class: F.Y. B.Sc.

	CO1: understand concepts on matrix operations and rank of the	
	matrix.	
MTH 101: Matrix Algebra	CO2: understand use of matrix for solving the system of linear	
	equations.	
	CO3: understand basic knowledge of the Eigen values and Eigen	
	vectors.	
	CO4: apply Cayley-Hamilton theorem to find the inverse of the	
	matrix.	
	CO5: know the matrix transformation and its applications in	
	rotation, reflection, translation.	
	CO1: understand basic concepts on limits and continuity.	
	CO2: understand use of differentiations in various theorems.	
MTH 102: Calculus	CO3: know the Mean value theorems and its applications.	
	CO4: make the applications of Taylor's, Maclaurin's	
	theorem.	
	CO5: know the applications of calculus	
	<u> </u>	
MTH 103(B): DISCRETE		
MATHEMATICS	CO1: Students are able to understand the concepts of relations,	
	coding and decoding mathematical logic, Boolean algebra.	
	CO1: understand basic concepts in differential equations.	
MTH 201: Ordinary	CO2: understand method of solving differential equations	
Differential Equations	CO3: understand use of differential equations in various fields	
<u> </u>		
	CO1: Students can find out roots of any equation of degree less than	
MTH 202: Theory of	or equal to five. Theory of equations is highly useful in various	
Equations	subjects like algebra, linear algebra, calculus, ordinary and partial	
	differential equations etc.	
MTH 203(A): Laplace	CO1: This course provides fundamental knowledge of Laplace	
Transform	transform and their applications in solving differential Equations.	

FY B. Sc. (2018-19)

MB 101: Microbial Diversity	CO1: Know general bacteriology and microbial aspects pertinent to bacteria, fungi and algae CO2: Understand the structural similarities and differences among various physiological groups of bacteria/archaea CO3: How the subject emerge as new branch of biology CO4: Learn ancient view about life continuity and concept of experiment
MB 102: Microscopy and Basic Bacteriology	CO1: Learn aseptic techniques and be able to perform routine culture handling tasks safely and effectively CO2: Demonstrate theory in microscopy and their handling techniques and staining procedures CO3: Comprehend the various methods for identification of unknown microorganisms
MB 201: Basic Biochemistry and Cytology	CO1: Understand the basic microbial structure and function and study the CO2: comparative characteristics of prokaryotes and eukaryotes and also Understand the structural architecture and differences among bacteria/archaea CO3: Know basic knowledge pertinent to cell biomolecules
MB 202: Microbial Techniques	CO1: Know general bacteriology and introduce microbial techniques for isolation of pure cultures of bacteria, fungi, algae and virus CO2: Demonstrate theory and practical skills in handling microbial culture
UG -S.Y. B. Sc (2018-19)	
MB - 231: Fundamental biochemistry	CO1: Understand the basic of microbial enzymology, nature of enzyme, their nomenclature, working mechanism, classification based on their action etc. CO2: Learn about nutrient uptake by microbes, various mechanism used to transport ions and molecules in microbial cells.
MB - 232: Microscopy and Microbial Ecology	CO1: Aware about concept of metabolism and its basic types. CO2: Cognizant about various pathways used by microbes to break down molecule and CO3: Generate ATP as a source of energy.

MB-241: Genetics and Immunology MB-242: Basic Microbial Biotechnology UG -T.Y. B. Sc (2018-19) Semester – V CO1: To introduce the concepts in Microbial Genetics. CO2: To acquaint with molecular techniques. CO3: To introduce with concepts related to bioreactors and their types. CO3: To understands the processes involved in fermentation. CO4: To introduce with concepts strain improvement and scale up. CO5: Understand aerobic, anaerobic respiration and fermentation and fermentation. CO5: Understand aerobic, anaerobic respiration and fermentation and fermentation and fermentation and fermentation. CO2: Concept and significance of mutation CO3: Methods to study mutation CO1: Characteristics of industrial strain CO2: Screening of industrially important microbes: Primary and Secondary CO2: To acquaint with molecular techniques. CO3: To update applied knowledge in the field of microbial genetics. CO1: To introduce with concepts related to bioreactors and their types. CO2: To acquaint with concepts strain improvement and scale up. CO3: To understands the processes involved in fermentation. CO4: To introduce with concepts related to bioreactors and their types. CO5: To acquaint with concepts strain improvement and scale up.		CO4: Aware about the regulations and energetics of various
MB-241: Genetics and Immunology MB-242: Basic Microbial Biotechnology UG –T.Y. B. Sc (2018-19) Semester – V CO1: To introduce the concepts in Microbial Genetics. CO2: To acquaint with concepts related to bioreactors and their types. CO2: To acquaint with concepts strain improvement and scale up. CO3: To understands the processes involved in fermentation. CO4: To introduce with concepts related to bioreactors and their types. CO5: To acquaint with concepts strain improvement and scale up. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts strain improvement and scale up.		
MB-241: Genetics and Immunology MB-242: Basic Microbial Biotechnology UG –T.Y. B. Sc (2018-19) Semester – V CO2: To introduce the concepts in Microbial Genetics. CO3: To acquaint with concepts related to bioreactors and their types. CO2: To acquaint with concepts strain improvement and scale up. MB352Fermentation Technology GO3: To understands the processes involved in fermentation. CO4: To introduce with concepts related to bioreactors and their types. CO4: To introduce with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts related to bioreactors and their types. CO5: To acquaint with concepts strain improvement and scale up.		
MB-241: Genetics and Immunology MB-242: Basic Microbial Biotechnology UG –T.Y. B. Sc (2018-19) Semester – V CO1: To introduce the concepts in Microbial Genetics. 00 1.1. D. DC (2010-17) DCMCSICI - VI	
	CO1: To get acquainted with the molecular regulatory
MD 361 Malagular Piology	mechanisms in bacteria.
MB 361 Molecular Biology	CO2: To understand the principles underlying techniques
	used in molecular Biology.
	CO3: To study the principle and applications of recombinant
	DNA technology.
	CO1: To introduce fermentation processes and their types.
MB 362	CO2: To provide knowledge about the chronological
Pharmaceutical Microbiology	development in fermentation.
	CO3: To acquire knowledge about large scale production of
	commercially valuable
	CO1: To understand regulation of enzyme action.
MB 363 Enzymology	CO2: To get acquainted with enzyme technology.
	CO3: To get knowledge about techniques involved in
	enzyme purification.
	CO4: To understand regulation of enzyme action.
	CO1: To create awareness about the infectious diseases.
MB 364 Clinical Microbiology	CO2: To create theoretical base for practical approaches.
WID 304 Chinical Whel oblology	CO3: To study prognosis of bacterial, viral and other
	diseases.
	CO1: To understand various protective mechanisms
	underlying the human immune system,
MB 365 Diagnostic Immunology	CO2: To study immunological disorders and tumours.
Wid 303 Diagnostic Immunology	CO3: To study the principles underlying various
	immunological techniques.
	CO4: To debate the immuno-prophylactic measures against
	various novel viral infections
	CO1: To understand concepts in plant pathology.
MB 366	CO2: To acquaint the students with basic knowledge of plant
	disease control.
Environmental Microbiology	CO3: To complement the students with the concepts in
	Agricultural Microbiology. CO4: To understand concepts in plant pathology.
	1004. To understand concepts in plant pathology.

PG - M.sc I Microbiology

Microbiology (June 2018-19)	
MB 101: Microbial taxonomy and diversity	CO1: To basic and applied aspects of microbial diversity and systematic. CO2: To Physiology, biochemistry and applications of basic and applied aspects of microbial diversity and systematic.
	CO3:.To study about Impact of various groups of microbes on earth atmosphere, human, plant and animal health and technology development.
MB 102 : Microbial Biochemistry	CO1: To study Structure, properties, pathways and significance of biomolecules.CO 2: Applications of microbial biomolecules in various fields.
MB 103 : Bio analytical Techniques	CO1: To Principles, working and application of bioinstruments used in isolation and identification of microbes. CO2: structural determination of biomolecules.
MB- 104 Methods in Microbiology MB-105 Methods in Biochemistry	CO1: To study Characteristics and significance of Extremophiles, Algae, Fungi, Viruses. CO2: To understand biomolecules.
MB 201: Microbial Genetics	CO1: Understand basic and applied aspects of Genetic makeup of bacteria, algae, fungi and viruses. CO2: Causes, mechanisms and consequences of defect in gene/genome of microorganisms.
MB 202: Microbial Enzymology	CO1: Understand the concept of microbial enzymes, enzyme kinetics, regulation of enzyme activity, industrial applications of enzymes.
	CO2: Enzyme function in non-aqueous environment
MB 203: Immunology	CO1: Understand the concepts of functions of cells CO2: Types of hypersensitivity.
MB- 204 Methods in Microbiology	CO1: Understand the concepts of techniques SDS ,PAGE, electrophoresis.
MB-205 Methods in Biochemistry	CO2: study plasmid isolation ,conjugation , transformation.

MB 301: Pharmaceutical	CO1: To introduce knowledge about antibiotics, biopharmaceuticals and GMP, ICH process
Microbiology	CO2: To familiarize the students with spoilage and regulatory aspects as well as quality control issues in pharmaceuticals.
MB 302: Applied Molecular	CO1: To learn about the various enzymes involved in r-DNA Technology
Biology	CO2: To know the principles of c-DNA construction and amplification methods.
	CO3: Making aware of synthesis of recombinant products
	CO1: To understand offline/ online strategies adopted for microbial analysis of food
MB - 303: Applied and Environmental Microbiology	CO2: To learn about role of microbes in wastewater treatment, as well as liquid and solid waste management
	CO3: To impart knowledge about removal of recalcitrant from contaminated environment
MB-304: Methods in Bioinformatics	CO1: To impart training about elementary aspects of statistics used in microbiology CO2:To introduce student to the variety of computational methods currently available for predicting functional behaviour of biological system CO3: To analyze the output data to predict a biologically relevant function
MB-305: Methods in Applied Microbiology	CO1: To impart training to students about various quality control analysis carried out for pharmaceuticals CO2:To familiarize the students with quality activities required in pharmaceutical industry
PG -M. Sc. II (2019-20) Semester IV	

MB – 401: Fermentation Technology	CO1: To introduce microbial fermentation, product recovery and bioreactor design CO2:To familiarize the student with separation techniques used for fermentation products CO3: To introduce the microbial process adopted for production of various metabolites	
MB - 402: Microbial Genetics	CO1: To extend the knowledge on molecular basis of mutation and repairs in microbes CO2:To understand different modes of gene regulation and expression mechanisms in bacteria CO3:To understand the principle role of plasmids, gene transfer methods and DNA replication	
MB – 403: Agricultural Microbiology	CO1: To introduce various attributes of microbial ecology and plant microbe interactions CO2:To learn the student about how plant elicit defence against pathogens CO3:To know biocontrol, biofertilizers for plant nutrition, remediation of salt-affected soils	
MB - 404: Methods in Biotechnology	CO1: To train the student in basic molecular biology tools CO2:To learn gene transfer and gene expression CO3:To introduce microbial interaction with plant	
MB – 405: Laboratory course (Project Dissertation)	CO1: To give exposure to the students to research culture and technology CO2: To introduce students how to select a research topic, plan, perform experiments, collect data and analyse the data CO3:To foster self-confidence and self-reliance in the students as he/she learns to work and think independently	
PG M. Sc (2020-21) Semester – III		
MB-301: Applied and Environmental Microbiology	CO1: To understand offline/ online strategies adopted for microbial analysis of food CO2:To learn about role of microbes in wastewater treatment, as well as liquid and solid waste management CO3:To impart knowledge about removal of recalcitrant from contaminated environment	
MB-302: Molecular Biology and Bioinformatics	CO1: To impart training about elementary aspects of statistics used in microbiology CO2: To introduce student to the variety of computational methods currently available for predicting functional behaviour of biological system CO3: To analyse the output data to predict a biologically relevant function	

MB-303: Pharmaceutical Microbiology	CO1: To introduce knowledge about antibiotics, biopharmaceuticals and GMP, ICH process CO2: To familiarize the students with spoilage and regulatory aspects as well as quality control issues in pharmaceuticals
MB- 304: Methods in Biostatistics and Bioinformatics	CO1: To impart training about elementary aspects of statistics used in microbiology CO2: To introduce student to the variety of computational methods currently available for predicting functional behaviour of biological system CO3: To analyse the output data to predict a biologically relevant function
MB- 305: Methods in Applied Microbiology	CO1: To impart training to students about various quality control analysis carried out for pharmaceuticals CO2: To familiarize the students with quality activities required in pharmaceutical industry

F. Y. B.Sc.

PHY-101- Basic Mechanics	CO1: Apply the concept and knowledge of Basic Mechanics to
	understand and solve real life problems.
1,100,100	CO2: Understanding of the course will create scientific
	temperament.
PHY-102 – Dynamics and	CO1: Apply the concept and knowledge of Dynamics and Properties
Properties of Matte	of Matter to understand and solve real life problems.
1 roperties of Maurice	CO2: Understanding of the course will create scientific
	temperament.
	CO1: Apply the concept and knowledge of Electricity and
PHY-201- Electricity and	Electrostatics to understand and solve real life problems.
Electrostatics	CO2: Understanding of the course will create scientific
	temperament.
PHY-202- Dielectrics,	CO1: Apply the concept and knowledge of Dielectrics, Magnetism
Magnetism and	and Electromagnetism to understand and solve real life problems.
Electromagnetism	CO2: Understanding of the course will create scientific
	temperament.
	CO1: To demonstrate their practical skills.
	CO2: To understand and practice the skills while doing Physics
PHY-103 & 203 –	practical.
Practical	CO3: To understand the use of apparatus and their use without fear.
	CO4: To correlate Physics theory concepts through practical.
	CO5: Understand the concepts of errors and their estimation.
PHY 301-	CO1: Apply the concept of use of knowledge of Thermodynamics
Thermodynamics and	and kinetic theory of gases to real life problems.
Kinetic Theory of Gases	CO2: Understanding of the course will create scientific
	temperament.
	CO1: Apply the concept of use of knowledge of Electronics to real
PHY 302 A: - Electronics I	life problems.
	CO2: Understanding of the course will create scientific
	temperament.
	CO1: Apply the concept of use of knowledge of Instrumentation to
PHY 302 B -	real life problems.
Instrumentation	CO2: Understanding of the course will create scientific
	temperament.
PHY 401 – Waves,	CO1: Apply the concept of use of knowledge of Waves and Sound

Oscillation and Acoustics	to real life problems.
	CO2: Understanding of the course will create scientific
	temperament.
	CO1: Apply the concept of use of knowledge of Optics and
PHY 402 – Optics and	LASERS to real life problems
LASER	CO2: Understanding of the course will create scientific
	temperament.
PHY 501 – Mathematical	CO1: Apply the concept and knowledge of Mathematical physics to
Physics	understand and solve real life problems
1 Hysics	CO2: Understanding of the course will create scientific temperament
	CO1: Apply the concept and use of knowledge of Solid state
PHY 502 – Solid State	Physics understand and solve the real life problems
Physics	CO2: Understanding of the course will create scientific
	temperament.
	CO1: Apply the concept and knowledge of Atomic and Molecular
PHY 503 – Atomics and	Physics to understand and solve the real life problems.
Molecular Physics	CO2: Understanding of the course will create scientific
	temperament.
DYXX #0.4 . TV	
PHY 504 – A- Electronics	CO1: Apply the concept and use of knowledge of Electronics and
II	Digital Electronics to real life problems.
	CO2: Understanding of the course will create scientific temperament
PHY 504 B –	CO1: Apply the concept and use of knowledge of Instrumentation to
Instrumentation II	understand and to solve real life problems.
instrumentation ii	CO2: Understanding of the course will create scientific temperament
	CO2. Oliderstanding of the course will create scientific temperament
	CO1: Apply the concept of use of knowledge of energy resources,
	solar radiations and conversion to real life problem.
	CO2: Understanding of the course will create scientific
PHY 505 – Solar Energy	temperament.
and Applications	CO3: To impart knowledge of basic concepts of solar cell
unu i ippiicutions	fundamentals.
	CO4: To provide the knowledge and methodology of conversion of
	solar energy into electricity.
	CO1: Apply the concept and use of knowledge of Microprocessor to
PHY 506 D –	understand and to solve real life problems.
Microprocessor I	CO2: Understanding of the course will create scientific temperament
	and the state of t
PHY 601 – Quantum	CO1: Apply the concept and use of knowledge of Quantum
Mechanics	Mechanics to real life problems.
	1

	CO2: Understanding of the course will create scientific
	temperament.
PHY 602 – Material	CO1: Apply the concept of use of knowledge of Material Science to real life problems.
Science	CO2: Understanding of the course will create scientific temperament.
	CO1: Apply the concept and use of knowledge of Nuclear Physics
PHY 603 – Nuclear	to understand and solve the real life problems.
Physics	CO2: Understanding of the course will create scientific
•	temperament.
	· ·
	CO1: Apply the concept and use of knowledge of Modern and
PHY 604 – Modern and	Applied Physics to understand and solve the real life problems.
Applied Physics	CO2: Understanding of the course will create scientific temperament.
PHY 605 – Basic	CO1: Handle and use various basic mechanical and electrical
Instrumentation Skills	measuring instruments CO2: Understanding of the course will create scientific temperament
	CO2. Orderstanding of the course will create scientific temperament
	CO1: Apply the concept and use of knowledge of Microprocessor to
PHY 606 D -	understand and to solve real life problems.
Microprocessor II	CO2: Understanding of the course will create scientific
	temperament.
	General Course Outcomes
	practical knowledge in real time solution
CO2: Design new instrument	
CO3: Ability of modeling and	
CO4: Ability of searching solution of physical problems in scientific and technical literature	
CO5: Student should be comfortable while using an instrument	
CO6: Student should be understood to develop the various electronic circuit. CO7: Describe the nature of electromagnetic wave and its propagation through different media and	
interfaces.	
CO8: Explain charge particles dynamics and radiation from localized time varying electromagnetic	
sources	, and the second
CO9: Understand and explain	the differences between classical and quantum mechanics
CO10: Students are able to determine the charge, mass of any nucleus by using various	
spectrographs.	
* *	ial be able to qualitatively describe the bonding scheme & its general
physics properties as well as	possible application.
1 ~ ~ 1 ~ ~	

CO12: Give a type of bond is able to describe its physical origin as well as strength.

CO13: Write programs to run on 8085 microprocessor based system.

Class: M.Sc.

PHY-101- Mathematical Method for Physics	CO1: Apply the concept and knowledge of Mathematical physics to understand and solve real life problems CO2: Knowledge about Vector calculus, Bessel Functions, Legendre Differential equations, complex variable, Laplace transforms, Fourier Series etc. and their physical significance is learnt by students. mathematical concepts are widely used in various physics derivations CO3: Understanding of the Basic Mathematical physics will create scientific temperament.
PHY-102 – Classical Mechanics	CO1: Apply the concept and use of knowledge of Classical Mechanics to real life problems. CO2: Understanding of the Classical Mechanics will create scientific temperament CO3: The Lagrangian and Hamiltonian approaches in classical mechanics. CO4: The classical background of Quantum mechanics and get familiarized with Poisson brackets and Hamilton -Jacobi equation.
PHY-103- Solid State Physics	 CO1: Apply the concept and use of knowledge of Solid state Physics understand and solve the real life problems. CO2: Understanding of the course will create scientific temperament CO3: Introducing the behavior of ferroelectric and ferromagnetic material in terms of their properties and applications. CO4: Introducing basic concepts via diffraction methods, lattice vibrations and free electrons, Hall effect. CO5: Understanding the basic transport properties of metals and semiconductors. CO6: Their introduction to the band structures for studying different materials
PHY-104 B – Electronics Instrumentation	CO1: Apply the concept and use of knowledge of Physics of Electronic Instrumentation to understand and solve the real life problems. CO2: Understanding of the course will create scientific temperament. CO3: Fabrication of integrated devices. CO4: Applications of electronic system. CO5: Bio-electric Signals and Electrodes
PHY-105 – Physics Laboratory I	CO1: Apply the concept and use of knowledge of the Basic Physics Laboratory course to real life problems. CO2: Amplifiers, diodes, various logic gates, flip-flops and multivibrator. CO3: Solar cell, Michelson interferometer, photovoltaic cell, lasers

CO4: Hall coefficient, Curie temperature, B-H curve. CO5: Digital electronics experiments. CO6: Understands in depth about thin film preparation and production controlling techniques and the application of thin films in the field of science & Technology. CO1: Apply the concept and use of knowledge of Statistical Mechanics to understand and solve the real life problems. CO2: Understanding of the course will create scientific temperament. CO3: Explain statistical physics and thermodynamics as logical consequences of the postulates of statistical mechanics to selected problems. CO5: Grasp the basis of ensemble approach in statistical mechanics to a range of situations. CO6: To learn the fundamental differences between classical and quantum statistics and learn about quantum statistical distribution laws. CO7: Study important examples of ideal Bose systems and Fermi systems. CO1: Apply the concept and use of knowledge of Classical Electrodynamics to understand and solve the real life problems CO2: Understanding of the course will create scientific temperament CO3: Have gained elaborated knowledge about the electrostatics and laws governing the charge distribution. CO4: Have gained ability to apply Laplace equation for calculating potentials CO5: Study in depth about Polarization, bound charges and boundary conditions. CO6: Realize the importance of application of Biot Savarts Law and Amperes law. CO7: Understand the relevance of different magnetization and the boundary condition of magnetic field. CO1: Apply the concept and use of knowledge of Quantum Mechanics to real life problems. CO2: Understanding of the course will create scientific temperament CO3: Linear vector spaces, versed in Hilbert space, concepts of basis and operators and bra and ket notation. CO4: Bobt Schrödinger and Heisenberg formulations and their applications. CO5: Theory of angular momentum and spin matrices, orbital angular momentum and clebsh Gordan Coefficients. CO6: Space -time symmetries and conservation laws, theory of identical part		and various optoelectronic devices.
CO5: Digital electronics experiments. CO6: Understands in depth about thin film preparation and production controlling techniques and the application of thin films in the field of science & Technology. CO1: Apply the concept and use of knowledge of Statistical Mechanics to understand and solve the real life problems CO2: Understanding of the course will create scientific temperament. CO3: Explain statistical physics and thermodynamics as logical consequences of the postulates of statistical mechanics to a range of situations. CO5: Grasp the basis of ensemble approach in statistical mechanics to a range of situations. CO5: Grasp the basis of ensemble approach in statistical mechanics to a range of situations. CO6: To learn the fundamental differences between classical and quantum statistics and learn about quantum statistical distribution laws. CO7: Study important examples of ideal Bose systems and Fermi systems. CO1: Apply the concept and use of knowledge of Classical Electrodynamics to understand and solve the real life problems CO2: Understanding of the course will create scientific temperament CO3: Have gained abbirated knowledge about the electrostatics and laws governing the charge distribution. CO4: Have gained ability to apply Laplace equation for calculating potentials CO5: Study in depth about Polarization, bound charges and boundary conditions. CO6: Realize the importance of application of Biot Savarts Law and Amperes law. CO7: Understanding of the course will create scientific temperament CO3: Linear vector spaces, versed in Hilbert space, concepts of basis and operators and bra and ket notation. CO4: Both Schrödinger and Heisenberg formulations and their applications. CO5: Theory of angular momentum and spin matrices, orbital angular momentum and conservation laws, theory of identical particles, Oscillators CO6: Space -time symmetries and conservation laws, theory of identical particles, Oscillators CO7: Time Dependent and independent Perturbation Theory, Variation Method, WKB Met		CO4: Hall coefficient, Curie temperature, B-H curve.
CO6: Understands in depth about thin film preparation and production controlling techniques and the application of thin films in the field of science & Technology. CO1: Apply the concept and use of knowledge of Statistical Mechanics to understand and solve the real life problems. CO2: Understanding of the course will create scientific temperament. CO3: Explain statistical physics and thermodynamics as logical consequences of the postulates of statistical mechanics. CO4: Apply the principles of statistical mechanics to selected problems. CO5: Grasp the basis of ensemble approach in statistical mechanics to a range of situations. CO6: To learn the fundamental differences between classical and quantum statistical distribution laws. CO7: Study important examples of ideal Bose systems and Fermi systems. CO1: Apply the concept and use of knowledge of Classical Electrodynamics to understand and solve the real life problems CO2: Understanding of the course will create scientific temperament CO3: Have gained ability to apply Laplace equation for calculating potentials CO5: Study in depth about Polarization, bound charges and boundary conditions. CO6: Realize the importance of application of Biot Savarts Law and Amperes law. CO7: Understand the relevance of different magnetization and the boundary condition of magnetic field. CO1: Apply the concept and use of knowledge of Quantum Mechanics to real life problems. CO2: Understanding of the course will create scientific temperament CO3: Linear vector spaces, versed in Hilbert space, concepts of basis and operators and bra and ket notation. CO4: Both Schrödinger and Heisenberg formulations and their applications. CO5: Theory of angular momentum and spin matrices, orbital angular momentum and Clebsh Gordan Coefficients. CO6: Space -time symmetries and conservation laws, theory of identical particles, Oscillators CO7: Time Dependent and independent Perturbation Theory, Variation Method, WKB Method, Collision Theory and		temperament.
Mechanics CO5: Grasp the basis of ensemble approach in statistical mechanics to a range of situations. CO6: To learn the fundamental differences between classical and quantum statistics and learn about quantum statistical distribution laws. CO7: Study important examples of ideal Bose systems and Fermi systems. CO1: Apply the concept and use of knowledge of Classical Electrodynamics to understand and solve the real life problems CO2: Understanding of the course will create scientific temperament CO3: Have gained elaborated knowledge about the electrostatics and laws governing the charge distribution. CO4: Have gained ability to apply Laplace equation for calculating potentials CO5: Study in depth about Polarization, bound charges and boundary conditions. CO6: Realize the importance of application of Biot Savarts Law and Amperes law. CO7: Understand the relevance of different magnetization and the boundary condition of magnetic field. CO1: Apply the concept and use of knowledge of Quantum Mechanics to real life problems. CO2: Understanding of the course will create scientific temperament CO3: Linear vector spaces, versed in Hilbert space, concepts of basis and operators and bra and ket notation. CO4: Both Schrödinger and Heisenberg formulations and their applications. CO5: Theory of angular momentum and spin matrices, orbital angular momentum and Clebsh Gordan Coefficients. CO6: Space -time symmetries and conservation laws, theory of identical particles, Oscillators CO7: Time Dependent and independent Perturbation Theory, Variation Method, WKB Method, Collision Theory and	DIW 201 G	consequences of the postulates of statistical mechanics.

	CO1: Apply the concept and use of knowledge of Physics of material Science to understand and solve the real life problems
PHY 204 – Material	
Science	CO2: Understanding of the course will create scientific temperament.
	CO3: The student will get familiar with Crystal imperfections, Diffusion in solids and mechanical properties. Phase transformations and heat treatment
	CO1: Apply the concept and use of knowledge of the Basic Physics Laboratory course to real life problems.
PHY 205 – Basic Physics	CO2: Understanding of the Basic Physics Laboratory course which will create scientific temperament.
Laboratory II	CO3: Students will have hand on experience of: Zeeman effect using LG plate, Construction & study of Pb-Sn binary phase diagram Hall coefficient, Dielectric constant at high frequency, Magnetic susceptibility, Design, build & test square, triangular and sine wave generator etc.
	CO1: Know about different atom model and will be able to
PHY 301 – Atomics and	differentiate different atomic systems, different coupling schemes and their interactions with magnetic and electric fields. CO2: Know about different atom model and will be able to differentiate different atomic systems, different coupling schemes and their interactions with magnetic and electric
Molecular Physics	fields. CO3: Be able to apply the principle of Raman spectroscopy and its applications in the different field of science & Technology. CO4: To become familiar with different resonance spectroscopic techniques and its applications.
	techniques and its applications. CO5: To find solutions to problems related different spectroscopic systems.
	CO1: know about different atom model and will be able to differentiate different atomic systems, different coupling schemes and their interactions with magnetic and electric fields.
PHY 302 – Material Synthesis and Preliminary	CO2: Have gained ability to apply the techniques of microwave and infrared spectroscopy to elucidate the structure of molecules.
Analysis	CO3: Be able to apply the principle of Raman spectroscopy and its applications in the different field of science & Technology. CO4: To become familiar with different resonance spectroscopic
	techniques and its applications. CO5: To find solutions to problems related different spectroscopic systems.
PHY 303 – Systematic	CO1: After successful completion of the course, the student is expected to: know about Systematic Materials Analysis and
Material Analysis	Applications CO2: Have gained ability to apply the techniques of Introduction to

	Characterization Techniques: Importance of materials
	characterization (NA + 1 + 1 + 1 + 1 + 1 + 1 + 1 + 1 + 1 +
	CO3: The students will know the Mechanical response of Materials under - Infrared Spectroscopy, Ultra Violet & Visible
	Spectroscopy: Regions of UV-Visible radiation, Scanning
	Tunneling Microscopy: An Introduction to Quantum
	Mechanical Tunneling,
	CO1: Apply the concept and use of knowledge of the Special
	Physics II course to real life problems.
PHY 304 – Special	CO2: Understanding of the Special Physics II course which will
Laboratory I	create scientific temperament. CO3: Students will have hand on experience of Practical Based on:
Laboratory 1	Measurement of thickness of thin film by Tolansky method,
	Material Synthesis, Material Science, Communication
	Electronics, Microprocessors.
	CO1: Conceive a problem based on published research and carry
	out comprehensive survey of literature
	CO2: Plan and carry out task in given framework of dissertation
	and present the work in written and viva
PHY 305 Project I	CO3: Use a holistic view to critically, independently and creatively identify, formulate and deal with complex issues
	CO4: Learn handling of instruments, use of chemicals and how to
	conduct the experiments
	CO5: Learn how to present the project in power point and answer
	the queries to examiners as well as science of writing
	CO1: Retrieve, analyses, comprehends the scientific information
AC 301 C – Seminar +	on a given topic and derives logical inferences.
Review Writing	CO2: Compile the scientific information on a topic, verify for similarity index or plagiarism.
, , , , , , , , , , , , , , , , , , ,	CO3: Deliver the interactive presentation of scientific data before
	audience and participate in open discussion with confidence.
	CO1: Apply the concept and use of knowledge of the Nuclear
	Physics course to real life problems.
	CO2: Understanding of the Nuclear Physics course which will
PHY 401 – Nuclear	create scientific temperament. CO3: Students will have hand on experience of theory Based on:
Physics	General Properties of Nuclei Constituents of nucleus and
v	their properties, Interaction of charged particle and EM
	radiations with matter Energy loss of charged particles,
	Particle accelerators and Radiation Detectors Classification of accelerators; Van-de-Graft generator etc.
	of acceptations, van de Graft generator etc.
	CO1: Apply the concept and use of knowledge of the
PHY 402 –	Nanomaterial's: Synthesis, Properties and Applications
Nanomaterial's: Synthesis,	course to real life problems. CO2: Understanding of the Nanomaterial's: Synthesis, Properties
Properties and	and Applications Physics course which will create scientific
Applications	temperament
тррисшоно	CO3: Students will have hand on experience of Theory Based on:
	Comparison of Nanomaterial's with bulk material, Different

	Techniques for synthesis of Nanomaterial's of magnetic nanoparticles, Magnetic properties-Super paramagnetic materials.
PHY 403 A– Renewable Energy Sources	 CO1: Apply the concept and use of knowledge of the Renewable Energy Sources course to real life problems. CO2: Understanding of the Renewable Energy Sources of Physics course which will create scientific temperament. CO3: Students will have hand on experience of Theory Based on: Solar Energy: Solar Energy conversion systems and their applications, Bio mass Energy Conversion Technologies: Origin of biomass, Biomass energy resources, Ocean Energy: Ocean as the potential energy resource.
PHY 404 – Special Laboratory II	 CO1: Apply the concept and use of knowledge of Special Laboratory II: Practical and Applications course to real life problems. CO2: Understanding of Special Laboratory II: Practical Physics and Applications Physics course which will create scientific temperament. CO3: Students will have hand on experience of theory based on: Schottky barrier determination for various semiconductors, To analyze the Raman Spectrum of a sample, Nanoparticles, LASERS, Microwaves.
PHY 405 – Project II	 CO1: Conceive a problem based on published research and carry out comprehensive survey of literature CO2: Plan and carry out task in given framework of dissertation and present the work in written and viva CO3: Use a holistic view to critically, independently and creatively identify, formulate and deal with complex issues. CO4: Learn handling of instruments, use of chemicals and how to conduct the experiments CO5: Learn how to present the project in power point and answer the queries to examiners as well as science of writing

Class: B. Sc. (Zoology)

	CO1 . To Understanding Develop a ferral defined understanding of the
EVD	CO1: To Understanding Develop a foundational understanding of the
F.Y.B.sc-	principles of
ZOO- 101	CO2: To taxonomy and classification, including the hierarchical organization of
Animal	animal groups.
Diversity I	CO3: To Identify and categorize major animal taxa based on morphological,
	anatomical, and molecular characteristics.
	CO 4: To analyze key evolutionary adaptations and innovations that has
	contributed to the diversity.
	CO5: To Understand the relationship between anatomical features and adaptive
	behaviors in different animal groups.
	CO6: To analyze the role of animal diversity in shaping ecosystem dynamics,
	community structure, and trophic interactions.
	CO7: To Understand the principles of island biogeography and examine case
	studies of species diversity and endemism in different biogeographic regions.
	CO1:To provide thorough knowledge about external morphological features of
	grasshopper
	CO2: To develop an understanding about internal structural and functional
	details of grasshopper including its reproductive system and life cycle. Learning
F.Y.B.sc-	outcomes: After successful completion of these course students.
ZOO- 102	
Animal	CO3: To Acquire knowledge about external morphological features of
Diversity II	grasshopper.
Diversity II	CO4: To Understand internal structural and functional details of grasshopper.
	CO5: To knowledge about reproduction and life cycle of grasshopper Unit
	Study of Grasshopper.
F.Y.B.sc-	
ZOO 201	
Comparative	CO1: To gain a knowledge base for understanding vertebrate anatomy levels of
Anatomy of	organization and related functions.
Vertebrates	
	CO2: To understand how organisms maintain gametes population.
F.Y.B.sc-	CO3: To understand fertilization process.
ZOO 202	
Developmental Biology of	CO4: To understand way of cleavage and different patterns to form zygote.
Vertebrates	CO5: To understand the fundamental embryonic development.
Vertebrates	CO6: To understand the complete process of formation of germ layers.
	CO1: To Understand the diversity and evolutionary relationships within non-
S.Y.B.sc-	chordate organisms.
ZOO 231 Non-	CO2: To Investigate physiological and ecological adaptations of non-chordates
	to their environments.
Chordates - II	CO3: To Explore the developmental processes and life cycles of various non-
	chordate species.
S.Y.B.sc-	CO1: To Investigate the relationship between animal species and human
ZOO 232	health, including zoonotic diseases and medical treatments derived from
Medical	animals.

Zoology	CO2: To Study the physiological, anatomical, and genetic similarities and differences between humans and various animal species to enhance medical knowledge and treatments. CO3: To Analyze the impact of environmental factors, such as animal-borne pathogens and pollutants, on public health and develop strategies for prevention and control.	
S.Y.B.sc- ZOO 241 Chordates – II	CO1: To Explore the anatomical, physiological, and behavioral diversity within chordates. CO2: To Investigate the evolutionary relationships and developmental processes among different chordate groups. CO3: To Understand the ecological roles and adaptations of chordates in	
S.Y.B.sc- ZOO 242 Applied Zoology	various environments. CO1: To Develop sustainable practices for animal husbandry, welfare, and production. CO2: To Investigate the role of animals in ecosystems and their impact on biodiversity and environmental health. CO3: To Study and mitigate the interactions between humans and wildlife to prevent conflicts and promote coexistence.	
T.Y.B.sc Zoo 351 Non- chordates III	CO1: To identify the taxonomic status of the entire non-chordates and discuss the evolutionary model of the group. CO2: To describe the general biology of few selected non-chordates useful to mankind. CO3: To know about some of the important and common protozoans, helminthes and arthropods of parasitic nature causing diseases in Nepal. CO4: To help knowing the basic concept of biosystematics and procedure in taxonomy. CO5: To make able to discuss some and very important phenomena in Non-	
T.Y.B.sc Zoo -352 Cell and Molecular biology	chordate. To help in the general survey of non-chordates in the area. CO1: To Students can understand the structure and functions of cell organelles. CO2: To understand the basic structure and functioning of the genetic materials-DNA and RNA. CO3:To learn about molecular mechanism of DNA replication	
T.Y.B.sc Zoo -353 Mammalian Histology and Physiology I	CO1: To acquire a basic background in histology and to understand the properties of cells and their interactions with one another as components of tissues and organs. CO2: To understand how structure and function correlate at the microscopic level. CO3: To be able to describe the normal structure and function of various cell types, tissues, and organs, and to differentiate their histological structures from each other through examination. CO4: To discuss the various birth defects for each organ system development. CO5: To describe the world's past biodiversity. CO6: To outline the history of life on earth; and to develop new ideas about evolution and ecology.	

	CO7: To understand disease mechanisms.		
	C83: To investigate environmental		
	Adaptations.		
	CO9: To evaluate drug effects.		
	Support clinical decision-making.		
	CO1: To understand will be able to evaluate evidence provided by data to		
	qualitatively and quantitatively investigate the role of natural selection in		
	evolution.		
	CO2: To Students will be able to apply mathematical methods to data from a		
	real or simulated population to predict what will happen to the population in the		
	future.		
TVD	CO3: To know evaluate data-based evidence that describes evolutionary		
T.Y.B.sc	changes in the genetic makeup of a population over time.		
Zoo 355	CO4: To Students will be able to connect evolutionary changes in a population		
Systematics, Evolution and	over time to a change in the environment.		
Paleontology	CO5: To understand will be able to justify data from mathematical models		
1 alcontology	based on the Hardy-Weinberg equilibrium to analyze genetic drift and the		
	effects of selection in the evolution of specific populations.		
	CO6: To students will get to know the different types of sedimentary and		
	metamorphic rocks and fundamentals of sedimentary and metamorphic		
	petrology.		
	CO7: To The students will able to understand the texture, structures and		
	process of their formation.		
	CO1: To acquire basic skills in the observation and study of nature.		
	CO2: To understand inculcate interest in adopting biological control strategies		
T.Y.B.sc for pest control.			
Zoo 356 B) Pest	CO3: To know various pests affecting our local crops and select the best		
management	method for their control.		
	CO4: To acquire basic knowledge and skills in agriculture management to		
	enable the learner for self-employment.		
	CO5: To Understand the diversity and evolutionary relationships within non-		
TVDss	chordate organisms.		
T.Y.B.sc Zoo 361	CO1: To Investigate physiological and ecological adaptations of non-chordates		
Chordates III	to their environments.		
Chordates III	CO2: To Explore the developmental processes and life cycles of various non-		
	chordate species.		
	CO1: To acquire Students develop understanding of the development of		
	embryology; basic human development (fertilization, implantation, embryo,		
TAD	placentation, development of three germ layers.)		
T.Y.B.sc	CO2: To understand molecular processes (induction, determination,		
Zoo 362 General	differentiation and growth), and of processes at all stages of embryogenesis and exogenesis.		
Embryology	CO3To understanding of histogenesis and organogenesis of particular tissues		
	and organs.		
	CO4:Students acquire knowledge of achievements in modern experimental		

	CO5: To understand Embryology and their practical use in daily work of a doctor, and of the elements and significance of comparative embryology.		
T.Y.B.sc Zoo 363 Mammalian Histology and Physiology II	CO1: To acquire a basic background in histology and to understand the properties of cells and their interactions with one another as components of tissues and organs. CO2: To understand how structure and function correlate at the microscopic level. CO3: To be able to describe the normal structure and function of various cell types, tissues, and organs, and to differentiate their histological structures from each other through examination. CO4: To discuss the various birth defects for each organ system development. CO5: To know describe the world's past biodiversity. CO6: To understand outline the history of life on earth; and (3) to develop new ideas about evolution and ecology.		
T.Y.B.sc Zoo 364 Research Methodology	CO1: To Understanding Research To the Research Methodology course in zoology is to provide students with a comprehensive understanding of research design and methodology. CO2: To students will learn about the various research designs used in zoological studies, such as observational studies, experimental designs, field surveys, and meta-analyses. CO3: To understand & developing Research Skills and Ethical Considerations: The second objective is to develop students' research skills and instill ethical considerations in zoological research. CO4: To students will learn how to formulate research hypotheses, design		
T.Y.B.sc Zoo 365 Micro technique	research projects, and develop research proposals. CO1:To prepare the whole mounts microscopic slides and staining reactions.		
T.Y.B.sc Zoo 366 C) Applied Zoology III	CO2: To understand main purpose of Poultry Farming is the production of eggs, meat, etc. CO3: To understand Numerous chickens were grown in poultry farms for the production of eggs and meat.		
(Permaculture, Poultry and Fisheries)	CO4: To Evaluate drug effects. CO1: To study molecular structures and functions.		
S.Y.B.sc ZOO 302 Biochemistry CO2: To Investigate metabolic pathways. CO3: To understand enzyme mechanisms. CO4: To Explore biochemical interactions in cells. CO5: To apply biochemistry to medical research and biotechnology.			
S.Y.B.sc SEC I Apiculture	CO1: To Promote sustainable beekeeping practices for honey production and pollination services. CO1: To conduct research to improve honeybee health and resilience against pests, diseases, and environmental stressors.		

	CO1: To educate beekeepers and the public about the importance of bees in		
	ecosystems and agricultural sustainability.		
S.Y.B.sc	CO1: To understand Student can gain knowledge about inheritance of characters and factor responsible for this.		
ZOO 401	CO2: To study the basic concepts of genetic principles.		
Genetics	CO3: To learn the principles of chromosome, syndromes and gene transformation.		
	CO1: To better understanding of species diversity and evolutionary		
	relationships.		
S.Y.B.sc	CO2: To insights into adaptation and survival strategies in changing		
ZOO 402	environments. CO3: To learn advances in conservation biology and preservation of		
Evolutionary	biodiversity.		
Biology	CO4: To understand &Identification of evolutionary mechanisms such as natural selection and genetic drift.		
	CO5: To application of evolutionary principles in medicine and agriculture.		
	CO1: To develop accurate and efficient diagnostic tests for detecting diseases		
S.Y.B.sc	and health conditions. CO2: To improve early detection and monitoring of diseases to facilitate timely		
SEC II Medical	and effective medical interventions.		
Diagnostics	CO3: To enhance diagnostic accuracy and reliability through advancements in		
	technology and methodologies.		
T.Y.B.sc	CO1: To learn about the various aspects of reproductive biology and endocrinology.		
Z00-501	CO2: To acquire a broad understanding of the hormonal regulation of		
Reproductive Endocrinology	physiological processes.		
Lindocrinology	CO3: To create awareness of new technologies in assisted reproduction as well as contraceptive methods.		
	CO1: To understand the basic structure of cells, tissues and their working		
T.Y.B.sc	system.		
Zoo-502 Cell	CO2: To Know the handling skill in laboratory methods of estimation,		
and Molecular Biology (CMB)	determination, working of cells and their molecules.		
	CO3: To Use of binocular research microscope and bioinstrumentation in laboratory.		
T.Y.B.sc Zoo-503			
Mammalian	CO1: To Understanding study the Histology of different tissues and systems of		
Histology	mammals.		
	CO1: To Studying animal cell and tissue culture techniques.		
T.Y.B.sc	CO2: To developing genetically engineered products for human animal		
Zoo-504	welfare CO3: To Developing gene transfer technologies, cloning, transgenic animals		
Animal Biotechnology	CO4: To Studying hybridism technique and production of antibodies.		
Distromining	CO5: To Impart knowledge about stem cell research.		
T.Y.B.sc Zoo-505 Public	CO1: To provide knowledge and understanding regarding life style diseases. CO2: To promote an understanding of the value of good life style practices,		
	I		

health and hygiene	physical fitness and healthy food habits for life style disease management.			
nygiche	CO3: To motivate them to practice yoga and meditation in day-to-day life.			
	CO1: To acquire basic skills in the observation and study of nature.			
	CO2: To inculcate interest in adopting biological control strategies for pest			
T.Y.B.sc	Control.			
Z00506 (A)	CO3: To know various pests affecting our local crops and select the bes			
Pest	method for their control.			
Management	CO4: To acquire basic knowledge and skills in agriculture management to			
	enable the learner for self-employment.			
TVD as	CO1: To understand habit, habitat and taxonomic status of Leech as			
T.Y.B.sc	invertebrates and Calottes as vertebrates.			
Zoo-601 Study of Leech &	CO1: To explain the basic aspects of structural and functional details of Leech			
Calotes.	and Calottes.			
	CO2. To atrada the versions at a in11 in the 1 1 1 1			
T.Y.B.sc Zoo	CO2: To study the various stages involved in the developing embryo.			
Embryol	CO3: To study the initial developmental procedures involved in chick. CO4: To know the processes involved in embryonic development and practical			
ogy	applications of studying the chick embryology.			
SJ	CO1: To acquire basic knowledge and skills in applied branches of zoology.			
	CO2: To acquire the students with self-employment capabilities.			
T. V. D.	1 1 1			
T.Y.B.sc	CO2: To provide scientific knowledge of profitable farming. CO3: To get technical awareness of vermin technology and vermicomposting			
Z00-	technique.			
603Appl ied	CO4: To convert unwanted, organic matter, particularly food scraps and paper			
Zoology	into fertile soil.			
2001053	CO5: To learn about all aspects of raising poultry for their meat and eggs.			
	CO6: To know the economics, problems and prospects of Vermicomposting			
	and Poultry.			
T.Y.B.sc	CO1: To understand prepare the whole mounts microscopic slides and staining			
Zoo-604 Micro	reactions.			
techniqu				
e				
	CO1: To understand some basic concepts of research and its methodologies.			
T.Y.Bsc	CO2: To select and define appropriate research problem and parameters.			
Zoo-605	CO3: To Understand the various techniques of Data Collection Observation,			
Researc	Questionnaire, Interview Schedule; Case Study, Social Survey, Content			
h	Analysis.			
Method	CO4: To understand Describing various types of Sampling.			
ology	CO3: To understand elaborate on Data Processing and Data Analysis.			
	CO6: To understand writing of dissertations, project proposals, project reports, research papers.			
T.Y.B.sc	CO1: To give scientific knowledge about mulberry cultivation, silkworm			
Zoo606(B)Seric	rearing techniques to the students.			
ulture	CO1: To train the students in compressive silk production techniques.			
uitui c	221. 13 train the statement in compressive since production techniques.			
M.Sc	CO1: To understand the structural and functional anatomy of no chordates.			
	<u> </u>			

Zoo-101	CO2: To acquire the knowledge about locomotors, nutritional and organs of			
Structure and	digestion and its mechanism.			
Functional	S C C C C C C C C C C C C C C C C C C C			
Anatomy of	CO3: To understand the respiratory, excretory and nervous coordinating			
Invertebrates	organization. CO4: To learn about the larval forms, colonial and social life of invertebrates.			
Invertebrates	CO4: 10 learn about the larval forms, colonial and social life of invertebrates			
	CO1: To understand the cellular organization with specific reference to plasma			
MSc-I	membrane, cell organelles and cell cycle.			
Zoo-102	CO2: To acquire the knowledge about basic concept of gametoger			
Cellular	fertilization and embryonic development.			
organization	CO3: To understand the concept of aging, apoptosis and senescence.			
and	CO1: To learn about the morphogenesis and organogenesis in specific animals.			
Developmental	CO1. To learn about the morphogenesis and organogenesis in specific animals.			
Biology				
	CO1: To understand start Goat rearing as a small business enterprise by liaising			
M.ScI	with different stake holders To manage Goat rearing effectively as a small			
Zoo-105	business enterprise.			
Goatery	CO2: To gain all round knowledge of Goat rearing as a business enterprise			
Goatery	rather than as a community profession.			
MC	CO1 T 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1			
MSc-I Zoo-201	CO1: To understand habit, habitat and taxonomic status of vertebrate animals.			
Structure and	CO2: To know the basic aspects of structural and functional anatomy of			
Functional	vertebrate animals.			
Anatomy of				
Vertebrates 4				
, crestates :	CO3: To learn about adaptive radiation in vertebrates.			
	•			
M.ScI Zoo-	CO1: To know fundamental aspects of Biochemistry.			
202	CO2: To study different biological reaction mechanism.			
Biochemistry	CO3: To know the importance of metabolism.			
y	CO4:To study the biochemical molecules and their interactions			
	estino study the offenentical molecules and their interactions			
	CO1: To know basic terms of biological techniques.			
M.ScI	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques.			
Zoo-203 Tools	CO1: To know basic terms of biological techniques.			
Zoo-203 Tools and Techniques	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques.			
Zoo-203 Tools	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used			
Zoo-203 Tools and Techniques in Biology	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology.			
Zoo-203 Tools and Techniques in Biology	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of			
Zoo-203 Tools and Techniques in Biology M.ScI Zoo-205	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of ecosystem, interactions of various factors of ecosystem.			
Zoo-203 Tools and Techniques in Biology M.ScI Zoo-205 Aquaculture &	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of ecosystem, interactions of various factors of ecosystem. CO2: To know the various biodiversity, hotspot and conservation of			
Zoo-203 Tools and Techniques in Biology M.ScI Zoo-205	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of ecosystem, interactions of various factors of ecosystem. CO2: To know the various biodiversity, hotspot and conservation of ecosystems.			
Zoo-203 Tools and Techniques in Biology M.ScI Zoo-205 Aquaculture & Ecology M.ScII	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of ecosystem, interactions of various factors of ecosystem. CO2: To know the various biodiversity, hotspot and conservation of			
Zoo-203 Tools and Techniques in Biology M.ScI Zoo-205 Aquaculture & Ecology M.ScII Zoo301	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of ecosystem, interactions of various factors of ecosystem. CO2: To know the various biodiversity, hotspot and conservation of ecosystems.			
Zoo-203 Tools and Techniques in Biology M.ScI Zoo-205 Aquaculture & Ecology M.ScII	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of ecosystem, interactions of various factors of ecosystem. CO2: To know the various biodiversity, hotspot and conservation of ecosystems. CO1: To understand habit, habitat and taxonomic status of vertebrate animals.			
Zoo-203 Tools and Techniques in Biology M.ScI Zoo-205 Aquaculture & Ecology M.ScII Zoo301 C)Entomology	CO1: To know basic terms of biological techniques. CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of ecosystem, interactions of various factors of ecosystem. CO2: To know the various biodiversity, hotspot and conservation of ecosystems. CO1: To understand habit, habitat and taxonomic status of vertebrate animals. CO2: To know the basic aspects of structural and functional anatomy of vertebrate animals.			
Zoo-203 Tools and Techniques in Biology M.ScI Zoo-205 Aquaculture & Ecology M.ScII Zoo301	CO2: To study the applications of the various biological techniques. CO3: To know the principle, working and applications of basic techniques used in biology. CO1: To know the differentiating ability of abiotic and biotic components of ecosystem, interactions of various factors of ecosystem. CO2: To know the various biodiversity, hotspot and conservation of ecosystems. CO1: To understand habit, habitat and taxonomic status of vertebrate animals. CO2: To know the basic aspects of structural and functional anatomy of			

302Enzymology	course.			
and	CO5: To learn practicing skill so that to join public or private labs.			
Immunology	203. To learn practicing skin so that to join paone of private laos.			
M.ScII	CO1: The programmer has been designed in such a way so that the students get			
Zoo-305	the flavor of modern aspects of Zoology/Animal Sciences.			
(B) Forensic	CO2: To know aims to enable the students to study Forensic Science as a			
Zoology	elective course.			
	CO1: To develop a strong foundation in entomology, including understanding			
	of the importance of insects to human society.			
M.ScII	CO2: To know the process of digestion and metabolism, circulation, excretion,			
Zoo-401	respiration, role of hormone in insect reproduction.			
C) Entomology	CO3: To familiarize the students with identification of insect pests, vectors and			
II	their control methods.			
	CO4: To develop a sufficient background for those students who wish to study			
	more advanced entomological topics.			
	CO1: To understand the basic structure of cells, tissues and their working			
M.ScII	system.			
Zoo-402	CO2: To Know the handling skill in laboratory methods of estimation,			
Molecular	determination, working of cells and their molecules.			
Biology	CO3: To Use of binocular research microscope and bioinstrumentation in			
	laboratory.			
M.ScII	CO1: To understand the process of writing, presentation and publication of			
Z00-405	research paper.			
(B)Writing & presenting	CO2:To learn the skills related to presentation of paper			
scientific	CO3:To avoid the mistakes in writing research paper			
research paper				
	CO1: To understand familiarize the student with the basic concept of			
F.Y.B.sc	Invertebrate Zoology.			
ZOO 101	CO2: To understanding of the ecological relationships of the local species.			
Invertebrate	CO3: To identify common and unknown species.			
Zoology	CO4: To understand the invertebrate taxonomy and diversity.			
F.Y.B.sc	CO1: To provide thorough knowledge about external morphological features of			
ZOO 102	grasshopper.			
Grasshopper	CO2: To develop an understanding about internal structural and functional			
The No	.details of grasshopper including its reproductive system and life cycle.			
chordate				
	CO1: To understand General Characters, habit, habitat and distribution of			
	vertebrate animals.			
EXP	CO2: To understand the classification of vertebrate animals.			
F.Y.B.sc	CO3: To know Accessory Respiratory Organs.			
ZOO 201	CO4: To know Migration in Fishes.			
Vertebrate Zoology	CO5:To understand Metamorphosis in frog and Parental care in Amphibians			
Zoology	CO6: To know Poisonous and non-poisonous snakes, Importance of snake			
	venom. CO7: To know Flight adaptations in birds, Migration in birds.			
	CO8: To understand Origin and Evolution of mammals.			
	COO. 10 understand Origin and Evolution of maininals.			

F.Y.B.sc	CO1: To understand habit, habitat and taxonomic status of vertebrates.			
ZOO 202 Frog-	CO2: To explain the basic aspects of structural and functional details of Frog.			
The Chordate	c = 2. To emplain the custo deposits of structural and randominal deaths of freg.			
	CO1: To understand the structural and functional anatomy of Invertebrates.			
M.ScI ZOO-	CO2: To acquire knowledge about locomotors, nutritional and organs of			
411Comparativ	iv digestion and its mechanism.			
e Anatomy of				
Invertebrates	organization.			
	CO4: To learn about the larval forms, colonial and social life of invertebrates.			
	CO1: To acquire knowledge regarding biochemical aspects of life.			
M.S. 1700	CO2: To understand different type of metabolic process and energetics thereof.			
M.ScI ZOO- 412	CO3: To make students familiar with details of enzymes, classes and factors			
Biochemistry	influencing rate of enzymatic reactions.			
Diochemistry	CO4: To learn about hormones, neurotransmitters and its mode of action.			
	CO5: To gain the insight about Proteomics and Genomics with its applications.			
	CO1: TO understand the students with a solid understanding of the fundamental			
	concepts and principles of biostatistics.			
	CO2: To understand & apply Statistical Methods to Biological Data: The			
	second objective is to enable students to apply statistical methods to analyze			
M.ScI ZO-413	and interpret biological data effectively.			
Biostatistics	CO1: To know Interpret and Critically Evaluate Research Findings.			
Diostatistics	CO2: To acquire biostatistics course aims to develop students' ability to			
	interpret and critically evaluate research findings in zoology.			
	CO3: To understand Experimental Design: The fourth objective is to equip			
	students with the knowledge and skills to apply biostatistics in designing scientific experiments in zoology.			
	CO1: To understand provide graduates in Biology a specialization in the field of Biodiversity, Conservation and Wildlife Management.			
	CO2: To understand & generate qualified students who can directly get jobs in			
M.ScI ZOO-	the allied fields of Biodiversity, Conservation and Wildlife Management.			
416 Wildlife	CO3: To understand & generate qualified postgraduates who can be part			
Conservation	professional organizations working in the field of conservation and environment			
and	protection.			
Management	CO4: To generate a team of post graduates who can take up jobs related to the			
	environment in educational institutions.			
	CO1: To learn the basics of science, scientific research its importance.			
	CO2: To learn the Ethics and plagiarism precautions to be taken while doing			
NAC T	research.			
M.ScI -	CO3: To understand the detailed referencing and literature review procedure			
ZOO417 Research	before beginning the research. CO4: To understand the process of writing research papers, research project			
Methodology				
Michiganogy	report and research proposal.			
CO5: To learn various advanced tools useful for the science are				
	the laboratory safety.			
M.ScI ZOO-	CO1: To understanding of the fundamental principles of comparative anatomy.			
1				

421	CO2: To understand skills in anatomical observation and comparison.			
Comparative Anatomy of Vertebrates	CO3: To understand evolutionary relationships among vertebrate groups: Comparative anatomy provides valuable insights into the evolutionary relationships among different vertebrate groups.			
	CO4: To acquired & Apply comparative anatomy to broader scientific contexts: The final objective of the course is to enable students to apply their knowledge of comparative anatomy to broader scientific contexts.			
M.ScI ZOO- 422 Immunology	CO1: To Understand all basics components of the immune system. CO2: To gain knowledge of how the immune system works building on their previous knowledge from biochemistry, genetics, cell biology and microbiology. CO3: To understand the role of cytokines in immunity and immune cell activation; and be able to identify and characterize cytokines of particular immune importance; • understand the significance the Major Histocompatibility Complex in terms of immune response and transplantation.			
ZO-423 Tools and Techniques in Life Sciences	CO1: To understand course is to introduce students to a range of essential tools and techniques used in life sciences research in the field of zoology. CO1: To Understand experience in using various laboratory techniques relevant to zoology. CO1: To learn about field sampling techniques and data collection methods specific to zoology. CO1: To Know Analysis and Interpretation: Students will learn how to analyze and interpret data collected using tools and techniques in life sciences.			
M.ScI ZOO- 426 Environmental Biology	CO1: To understand the Population and age structure of Population. CO2: To understand Growth of organism and models of population growth. CO3: To acquire knowledge of prey-predator system. CO4: To know Competition in Nature and concept of niche. CO5: To understand Community, Diversity and Ecological Succession. CO6: To Understanding the need of conservation.			

UG -B. Sc. (Biotechnology)

F. Y. B.Sc. (2018-19)

BT 101: Cell Biology	CO1: learn basic knowledge pertinent to cell as unit, cell organelles and its architecture CO2: know the structural and functional details of cell CO3: How the subject emerge as new branch of biology CO4: Learn ancient view about life continuity and concept of experiment	
BT 102: Biochemical Tools	Co 1. Understand the fundamental biochemical concepts and familiarize with standard solution, buffer and reactions CO2: Describe the concepts of pH and its biological significance, buffers, Henderson-Hassel Balch equation, biological buffer systems and their importance CO3: Comprehend the various methods for identification of unknown microorganisms	
BT 201: Biomolecules	CO1: Overview of major biomolecules –carbohydrates, lipids, proteins, amino acids, nucleic acids, classification, structure, function of the above mentioned biomolecules CO2.comparative characteristics of prokaryotes and eukaryotes and also Understand the structural architecture and differences among bacteria/archaea CO3: Know basic knowledge pertinent to cell biomolecules	
BT 202: Basic Microbiology	CO1: Understand the basic microbial structure and study the comparative characteristics of prokaryotes and eukaryotes and familiarize the structural similarities and differences among various microbes CO2: Know various Culture media and their applications and also understand various physical and chemical means of sterilization	
UG –S.Y. B. Sc (2018-19)		
BT: 301 Basic Genetics	CO1: understand basic concept of Gene, DNA & understand the Mendel's laws CO2: study mutation and chromosomal variations learn basic aspect about gametogenesis and cell cycle.	
BT 302: Bioprocess Technology	CO1: Develop an understanding of the various aspects of Bioprocess Technology. CO2.Cognizant about various pathways used by microbes to break down molecule and CO3: Aware with screening of Industrially Important Strains and culture collection centres CO4: Aware about the regulations and energetics of various pathways. CO5.Understand aerobic, anaerobic respiration and fermentation	

	004 1 11 1 2===	
	CO1: understand basic structure of DNA	
BT 401: Molecular Biology	understand central dogma of molecular biology	
	CO2.Concept and significance of mutation	
	CO3: Methods to study mutation	
	CO1: know the cellular ontogeny and organ involvement in	
DE 100 1	immunity and explain the principles of self-tolerance and	
BT 402: Immune Response	autoimmunity	
	CO2: know how the immune system can fight infections and	
HC THE C (2010 10) C	cancer, including examples of immunodeficiency diseases	
UG –T.Y. B. Sc (2018-19) Semester – V		
	CO1: To introduce the concepts in Microbial Genetics.	
DT 251 C 4	CO2: To provide basic knowledge about the fundamental	
BT-351 Genetics	molecular process of living cells	
	CO3: To introduce the students to the principles of ecology	
	and genetic disorders	
	CO1: This course presents application of plant	
	biotechnology in agriculture, Nitrogen fixation and Bio	
	fertilizer, Rhizosphere microflora and its role in the	
	rhizosphere.	
	CO2. The course presents understanding of Plant pathology	
BT-352 Agricultural	and disease control, horticulture and	
Biotechnology	floriculture	
	CO3: To understand the processes involved in fermentation.	
	CO4: To introduce with concepts related to bioreactors and	
	their types.	
	CO5.To acquaint with concepts strain improvement and scale	
	up.	
	CO1: To introduce the students to the basic principles of	
	Animal tissue and cell culture	
BT-353 Animal Biotechnology	CO2: The course will describe as to how animal cell culture	
D1-333 Animai Diotechnology	is carried out for research and diagnostic	
	purposes	
	CO3: How transgenic animals are generated, what are the	
	pros and cons along with ethical issues	
	associated with transgenesis	
	CO1: To acquire requisite skills for the design and	
BT-354 Industrial Biotechnology	development of bioreactors, media, sterilization, microbial	
	growth etc.	
	CO2.To acquaint with the principles of Bioenergetics	
	CO1: The course provides understanding of Microbial	
	analysis of milk, Microbial production of fermented food viz.	
DT 255 Food Distashmala	cheese, bread etc.	
BT-355 Food Biotechnology	CO2: Causes of food spoilage, Spoilage of fruit, Vegetables,	
	Dairy product.	
	CO3: Food Preservation –Chemical Method, Physical	
	method	
	momou	

	CO1 A ' ' ' ' '		
BT-356 Environmental	CO1: An exposure to environmental perspectives.		
Biotechnology	CO2: Insight into the management of wastewater,		
	biodegradation techniques bioremediation and		
	xenobiotics		
UG-T.Y	UG –T.Y. B. Sc. (2018-19) Semester – VI		
(_0_0_0_0_0_0_0_0_0_0_0_0_0_0_0_0_0_0_0			
	COL TO 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1		
	CO1: To get acquainted with the molecular regulatory		
BT-361Gene Biotechnology and	mechanisms in bacteria.		
Bioinformatics	CO2.To understands the principles underlying techniques		
	used in molecular Biology.		
	CO3: To study the principle and applications of recombinant		
	DNA technology.		
BT-362 Plant Biotechnology	CO1: Understand concept of tot potency, organization of		
D1-302 I failt Diotechnology	plant tissue culture.		
	CO2: PTC, meristem culture, organ culture		
	CO3: Principles and applications of phytohormones		
	CO1: Basic principles of Immune system, types of		
BT-363 Immunology	immunity, primary and secondary lymphoid organ.		
	CO2: Antigen presentation, immune response lymph organs,		
	complements system, immunological		
	disorders		
	CO1: Basic principles of upstream and downstream process		
BT-364 Advanced Bioprocess	of different commercially important		
technology	products: enzymes, antibiotics, organic acids		
	CO2.To create theoretical base for practical approaches.		
	CO3: Understand Quality and economic aspects ion		
	fermentation		
	CO1: To understand various protective mechanisms		
BT-365 Pharmaceutical	underlying the human immune system,		
Biotechnology	CO2. To study immunological disorders and tumours.		
Diotechnology	CO3: To study the principles underlying various		
	immunological techniques.		
	CO4: To debate the immuno-prophylactic measures against		
	various novel viral infections		
	CO1: To understand concepts in plant pathology.		
BT-366 Biodiversity and	CO2: To acquaints the students with basic knowledge of		
	plant disease control.		
Biometry	CO3: To complement the students with the concepts in		
	Agricultural Microbiology.		
	CO4: To understand concepts in plant pathology.		

PG - M.sc I Biotechnology

Biotechnology (June 2018-19)			
BT 101: Microbial Physiology and diversity	CO1: To basic and applied aspects of microbial diversity and		
	systematic.		
	CO2: To Physiology, biochemistry and applications of basic and		
	applied aspects of microbial diversity and systematic.		
	CO3:.To study about Impact of various groups of microbes on earth		
	atmosphere, human, plant and animal health and technology		
	development.		
BT 102 : Biochemistry	CO1: To study Structure, properties, pathways and significance of		
	biomolecules.		
	CO2 : Applications of microbial biomolecules in various fields.		
BT 103 : Immunology	CO1: Understand the concepts of functions of cells		
	CO2: Types of hypersensitivity.		
BT- 104 Methods in	CO1:To study Characteristics and significance of Extremophiles,		
Microbiology &	Algae, Fungi, Viruses.		
biochemistry	CO2:To understand biomolecules		
BT-105 Methods in n			
Enzymology and			
Immunology			
BT 201: Molecular Biology	CO1: Understand basic and applied aspects of Genetic makeup of		
	bacteria, algae, fungi and viruses.		
	CO2: Causes, mechanisms and consequences of defect in		
	gene/genome of microorganisms.		
DT 202 - D' 1 4' 1	CO1: To Principles, working and application of bioinstruments used		
BT 202: Bioanalytical	in isolation and identification of microbes. CO2: structural determination of biomolecules.		
Techniques	CO2: structural determination of biomolecules.		
	CO1: Bioprocess and the kinetic aspects, types of fermenters		
BT 203: Bioprocess	developed for specialized applications, extraction.		
Technology	CO2: purification of fermentation product, concept of quality		
remotogy	process and related documentation.		
BT- 204 Methods in	CO1: Understand the concepts of techniques SDS, PAGE,		
Microbiology	electrophoresis.		
BT-205 Methods in	CO2: study plasmid isolation, conjugation, transformation.		
Biochemistry	J. J		

PG – M. Sc. II (2018-19) Semester III

BT-301 Genetic Engineering	CO1: To learn about the various enzymes involved in rDNA Technology CO2: To know the principles of cDNA construction and amplification methods.	
BT-302 Plant Biotechnology.	CO1: The objectives of this course is to introduce students to the principles, practices and application of animal biotechnology, plant tissue culture, plant and animal genomics, genetic transformation and molecular breeding of plants and animals	
BT-303: Applied and Environmental Microbiology	CO1: To understand offline/ online strategies adopted for microbial analysis of food CO2: To learn about role of microbes in wastewater treatment, as well as liquid and solid waste management CO3: To impart knowledge about removal of recalcitrant from contaminated environment	
BT-304: Methods in Bioinformatics	CO1: To impart training about elementary aspects of statistics used in microbiology CO2: To introduce student to the variety of computational methods currently available for predicting functional behavior of biological system CO3: To analyses the output data to predict a biologically relevant function	
BT-305: Methods in Applied Microbiology	CO1: To impart training to students about various quality control analysis carried out for pharmaceuticals CO2: To familiarize the students with quality activities required in pharmaceutical industry	
PG -M. Sc. II (2018-19) Semester IV		
BT – 401: Fermentation Technology	CO1: To introduce microbial fermentation, product recovery and bioreactor design CO2: To familiarize the student with separation techniques used for fermentation products CO3: To introduce the microbial process adopted for production of various metabolites	

BT - 402: Microbial Genetics		CO1: To extend the knowledge on molecular basis of mutation and repairs in microbes CO2: To understand different modes of gene regulation and expression mechanisms in bacteria CO3: To understand the principle role of plasmids, gene transfer methods and DNA replication		
BT – 403: Agricultural Microbiology		CO1: To introduce various attributes of microbial ecology and plant microbe interactions CO2: To learn the student about how plant elicit defence against pathogens CO3: To know bio control, bio fertilizers for plant nutrition, remediation of salt-affected soils		
BT - 404: Methods in Biotechnology		CO1: To train the student in basic molecular biology tools CO2: To learn gene transfer and gene expression 3. To introduce microbial interaction with plant		
BT – 405: Laboratory course (Project Dissertation)		CO1: To give exposure to the students to research culture and technology CO2: To introduce students how to select a research topic, plan, perform experiments, collect data and analyses the data CO3: To foster self-confidence and self-reliance in the students as he/she learns to work and think independently		
PG M. Sc (2018-19) Semester – III				
BT-301: Applied and Environmental Microbiology	CO1: To understand offline/ online strategies adopted for microbial analysis of food CO2: To learn about role of microbes in wastewater treatment, as well as liquid and solid waste management CO3: To impart knowledge about removal of recalcitrant from contaminated environment			
BT-302: Molecular Biology and Bioinformatics	CO1: To impart training about elementary aspects of statistics used in microbiology CO2: To introduce student to the variety of computational methods currently available for predicting functional behavior of biological system CO3: To analyze the output data to predict a biologically relevant function			
BT-303: Pharmaceutical Microbiology	CO1: To introduce knowledge about antibiotics, biopharmaceuticals and GMP, ICH process CO2: To familiarize the students with spoilage and regulatory aspects as well as quality control issues in pharmaceuticals			

BT- 304: Methods in Biostatistics and Bioinformatics BT- 305: Methods in Applied Microbiology	CO1: To impart training about elementary aspects of statistics used in microbiology CO2: To introduce student to the variety of computational methods currently available for predicting functional behavior of biological system CO3: To analyze the output data to predict a biologically relevant function CO1: To impart training to students about various quality control analysis carried out for pharmaceuticals CO2: To familiarize the students with quality activities required in pharmaceutical industry	
M.Sc. Part II (2018-19) (S	Semester IV)	
BT - 401: Fermentatio Technology	CO1: To introduce microbial fermentation, product recovery and bioreactor design CO2: To familiarize the student with separation techniques used for fermentation products CO3: To introduce the microbial process adopted for production of various metabolites	
BT-402: Applied Molecu Biology	CO1: To extend the knowledge on molecular basis of	
BT-403: Agricultura Microbiology	CO1: To introduce various attributes of microbial ecology and plant microbe interactions CO2: To learn the student about how plant elicit defence against pathogens CO3: To know biocontrol, biofertilizers for plant nutrition, remediation of salt-affected soils	
BT-404: Methods in Biotechnology		
BT-405: Laboratory cou (Project Dissertation)	plan perform experiments collect data and analyse the data	

Class: FYBSC 2018-19

CO1 P : 1 : 1 : 1 : 1 : 1 : 1 : 1 : 1		
	CO1: Provide identification technique diversity among Microbes.	
	CO2: To study systematic, morphology and structure of Bacteria,	
Bot. 101: Microbial	Viruses, Algae and Fungi.	
Diversity, Algae & Fungi	CO3: Understand the life cycle pattern of Bacteria, Viruses, Algae	
Diversity, rugae & rungi	and Fungi.	
	CO4: Students will aware about useful and harmful activities of	
	Bacteria, Viruses, Algae and Fungi.	
	CO1: To study the diversity of angiosperms.	
	CO2: Understand the comparative account among the families of	
Bot. 102: Plant Taxonomy	angiosperms.	
·	CO3: Students will able to understand economic importance of the	
	angiosperm plants.	
	CO1: To study salient features of Archegoniates.	
	CO2: To make students aware of the status of higher cryptogams&	
Bot. 201: Diversity Of	gymnosperms as a group in plant kingdom.	
Archegoniates	CO3: To study the life cycles of selected genera.	
The energy mates	CO4: Students will able to understand economic and ecological	
	importance of Archegoniates.	
	importance of Archegomates.	
	CO1: Students will able to scope and importance of the discipline	
	CO2: Students will able to plant communities and ecological	
Bot. 202: Plant Ecology	adaptations in plants.	
	CO3: To know about conservation of biodiversity.	
	CO3. To know about conscivation of blodiversity.	
	Class: FYBSc 2022-23	
	CO1: Provide identification technique of microbes, Viruses,	
	Bacteria, Algae and Fungi.	
Bot. – 101: Diversity Of	CO2: Understand the systems of classification of Microbes, Viruses,	
Lower Cryptogams	Bacteria, Algae and Fungi, and its interdisciplinary approaches.	
	CO3: Provide lab-based training in writing short species	
	descriptions and illustration.	
	1	
	C01: Students will able to understand ground plan of angiospermic	
Bot. – 102: Morphology Of	plant	
	CO2: Students will aware about vegetative and reproductive	
Angiosperms	characteristics of angiospermic plant.	
1 mgrosper ms	CO3: Students will able to understand the modifications and	
	functions of plant parts.	
	runctions of prant parts.	
1		

D-4 201. Diit- Of	CO1: Student will be able to understand the basic knowledge of the
	subject.
Bot-201: Diversity Of	CO2: To understand the basic structure and study the comparative
Higher Cryptogams	characteristic of Bryophytes and Pteridophytes.
	CO3: Also, to understand the structural similarities and differences
	among both the groups.
	CO1: Understanding of Angiospermic plants Causes of phenomenal
Bot-202: Taxonomy Of Angiosperms	succession and alternation of generation.
	CO2: Understand the systems of classification of angiosperms,
	nomenclature and interdisciplinary approaches.
	CO3: Recognize members of the major angiosperm families by
	identifying their diagnostic features, economic and medicinal
	importance.

Class: FYBSC

	CO1: Apply the rules of logarithm for solving numericals in chemistry
CH. 101 Dhandarland	CO2: Draw, calculate the slope of various graphs for chemistry
	experiments
CH: 101 Physical and Inorganic Chemistry	CO3: Calculate derivative and integration of some simple functions
morganic Chemistry	especially related to chemical problems
	CO4: Various theories and principles applied to reveal atomic structure
	CO5: Nature of matter and experiments which confirmed it.
	CO1: Different types of bonds and structures of organic compounds.
	CO2: Different types of structural effects and their effect on the strength
CH: 102 Organic and	of acids and bases.
Inorganic Chemistry	CO3: Fundamentals of organic reaction mechanism, structural
inorganic Chemistry	isomerism, methods of purification of organic compounds.
	CO4:Different types of solvents used in organic reactions
	Students will be able to understand:
	CO5:SP3, SP2 and SP hybridizations

Class: SYBSC

CO1: To gain knowledge about origin of surface tension.			
CO2: To determine surface tension.			
CO3: To get idea regarding viscosity.			
CO3:Students will be able to apply thermodynamic principles to			
physical and chemical			
CO5: Calculations and significance of entropy.			
CO6: Students will be able to understand equilibrium.			
CO7:To learn and apply various concepts such as			
CO1:The course helps to build up a conceptual framework for			
understanding the principles and theories for chemical bonding and			
properties of inorganic compounds			
CO2: Understood various methods of synthesis of heterocyclic			
compounds.			
CO3: Acquire skill to predict reactivity of heterocyclic compounds.			
CO4:To gain the knowledge about acid and bases according to			
different type theories			
CO1: Explain the fundamentals of analytical methods and			
instruments for qualitative and quantitative Analysis.			
CO2: Express the role of analytical chemistry in science.			

Class: TYBSC

	CO1: After successful completion of this course, students are
CH-501 Subject- Principles of	expected to Understand the significance of wave function and
	postulates of quantum mechanics.
	CO2:Deduce rate equations and half-life equations for first and
	second order reactions
Physical Chemistry-I	CO3:Draw and explain the one and two component system phase
	diagrams
	CO4:Explain the principles of electrode processes and
	CO5:apply them during Practicals
	COS.appry them during Fracticals
	CO1: Learn about the VSEPR theory and how it can be used to
	explain molecular shapes.
CH-502	CO2: Learn about the VBT to describe the formation of covalent
	bonds in terms of atomic orbital overlap.
Subject-Inorganic Chemistry	
Chemistry	CO3: Learn about stability of complexes using CFSE. CO4: Learn about MOT to draw energy diagrams and to predict
	bond order.
	bond order.
	001001001001001001001001001001001001001
	CO1:Students will learn organic reactions like nucleophilic
	substitution, electrophilic substitution, nucleophilic addition,
	electrophilic addition and elimination
	CO2: Students will be able to write/ explain mechanisms of those
	types of reactions.
	CO3:Students will understand how a reaction takes place in one or
CH-503	more
Subject- Organic Reaction	CO4: Students will understand the types of intermediates steps
Mechanism	formed in different reactions.
	formed in different reactions.
	CO5: Students will learn how reagent attacks the substrate molecule
	and accordingly how bonds break and formed.
	CO6: Students will learn how change in structure of substrate,
	reagent and solvent changes the product formed and its
	stereochemistry.
	CO1: Basic requirements of Chemical Industry, different terms,

CII FOA	2 1 1 1 1 1 1 1 1 1	
CH-504	operations and processes involved in chemical Industry.	
Subject- Industrial Chemistry	CO2: Describe Copy Right Act, Patent Act and Trade Marks, Bureau of Indian Standards (BIS) and International Organization for Standardization (ISO). CO3:Basic requirements, raw materials, different processes and operations involved in Sugar Industry and also different grades of sugar and uses of by-products of sugar industry.	
	CO4:Importance of fermented products, basic requirements, theory and process of alcohol making, fractional distillation and various terms involved in Fermentation Industry.	
	CO5:Understand Occurrence of Petroleum, theories of formation of Petroleum and different terms Viz. Knocking, Anti-Knock Compounds, Octane number, Cetane number, Gasohol and Power alcohol etc.	
	CO6:Manufacturing processes involved in Industrial Organic Synthesis such as Methanol, Isopropanol, Glycerol, Acetylene and Aromatic hydrocarbon i.e. Toluene from petroleum with their uses	
CH-505 Subject- Analytical Instrumentation	CO1: To develop an understanding of the range and uses of analytical methods in chemistry. CO2:To understand and establish the role of chemistry in quantitative analysis CO3: To enhance the Analytical instrumental skill of the students. CO4: Explain the fundamentals of analytical methods and instruments for qualitative and quantitative Analysis. CO5: Express the role of analytical chemistry in science. CO6:Students will be able to function as a member of an interdisciplinary problem solving team	
merascipinary problem solving team		
CH-506(B) Subject- Green Chemistry	CO1:With this course, the graduate students will be able to understand the twelve principles of green chemistry that will help to build the basic understanding of toxicity, hazards and risk of chemical substances CO2: The course will help to understand stoichiometric calculations and relate them to green chemistry metrics. The students will learn about atom economy and understand its importance over percentage yield	
	CO3:The students will learn to design safer chemicals, products and processes that are less toxic than the conventional chemistry, understand significance of catalysis, use of renewable feed stock,	

	renewable energy sources, importance of green solvents, etc.
	CO4: The course will train the students to appreciate green chemistry and boost the students to think and develop the skills to innovate and search for the solutions to environmental problems. CO5: Green chemistry is only way of future chemistry to ensure sustainability with absolute zero waste. The success stories and real-world cases will motivate the young generation to practice green chemistry.
	PG -M.Sc.
	Class: MSC I
CH-411:	CO1:Students should able to understand core and study of chemical kinetics and spectroscopy
Advanced Physical Chemistry–I	CO2:Apply the quantum mechanical principles to simple systems of chemical CO3: Students should understand the importance of statistical
	thermodynamics and concept of partition functions.
CH-413 : Advanced Organic Chemistry-I	CO1:Develop knowledge of substitution (electrophilic, nucleophilic) addition and elimination reactions
	CO2:Differentiate between various organic reactive intermediates and their reactions
	CO3:Students can understand the carbon-carbon multiple bonds and carbon heteroatom multiple bonds- Mechanism and stereochemical aspects
CH-416-A: Advanced Inorganic Chemistry	CO1:The course helps to build up a conceptual framework for understanding the principles and theories for chemical bonding and properties of inorganic compounds.
	CO2:The course helps to furnishes the basic concepts of group theory and its applications for various inorganic compounds CO3: The course furnishes knowledge of Organometallic compounds of some important transition metals and their applications. CO4: The course offers information lying on synthesis, structure, bonding, reactivity and properties of some selected non transition elements.

RM-417 :Research Methodology for Sciences Learning outcomes:	CO1:Students will understand the basic concept of science and scientific research
	CO2:Learn and follow the ethical guidelines while doing research avoid plagiarism in research publications
	CO3: Able to write a comprehensive literature review on a given research
	CO4:To be able to write a crisp research proposal or research project independently
	CO5: To be learn most advanced chemistry tools for the efficient research work.
	CO6:Acquire knowledge about various hazardous chemical handling procedures and implement it while working in the laboratory

Class: M.Sc. II:

	CO1: To make the students conversant with the CO-1. Learn in
	detailed strength of acid and bases. Understand the Linear free
GH 370	energy relationship, Hammett and Taft equation, substituent and
	reaction constants
CH-350:	CO2:Detailed mechanism of hydrolysis with breaking and
Organic Reaction Mechanism	formation of sigma bond
Mechanism	CO3: Study of reaction of carbanion with detailed mechanism,
	coupling reactions along with name reactions.
	CO4: Study of basics of photochemical reactions and learn various
	photochemical reactions
	CO1: Study of basics of photochemical reactions and learn various
	photochemical reactions To make the students conversant with the
	CO-CO2: Study 1H NMR Spectroscopy: Chemical Shift,
	deshielding, correlation for protons bonded to carbon and other
	nuclei
CH-351: Spectroscopic Methods in Structure Determination	CO2:Study of basics of photochemical reactions and learn various photochemical reactions
	CO3: Study of basics of photochemical reactions and learn various
	photochemical reactions 2D NMR techniques: COSY, homo and
	hetero nuclear 2D resorts spectroscopy, NOESY and the
	applications.
	CO4: Study of mass spectrometry: Instrumentation, various
	methods of ionization, FAB, ESI, TPSI, MALDI, TOF, Mass

	spectral fragmentation of Organic compounds
CH-352 Organic Stereochemistry	CO1: To make the students conversant with the CO-1. To learn and apply various concepts such as stereochemistry and fundamental principles of stereo selectivity in organic chemistry.
	CO2: Study of different types of per cyclic reactions. CO-3. Study of stereo chemical aspects of fused and bridged rings. CO3: Study of stereo chemical aspects of six membered and other related rings CO-5 Study of prochirality and topocity.

CH-353	A:	CO1: Understood various methods of synthesis of heterocyclic compounds.
Heterocyclic	CO2: To predict the product and suggest the mechanism	
Chemistry	Chemistry	CO3: Understand the importance of heterocyclic in industry as well
		as in drug discovery.

UG -B.Sc. SEM II

Class: FYBSC

	CO1:To gain knowledge about origin of surface tension	
	CO2: To determine surface tension.	
	CO3: To get idea regarding viscosity.	
CH: 201 Physical and	CO4:To get idea regarding viscosity	
Inorganic Chemistry	CO5: Students will be able to understand equilibrium.	
	CO6:Students will be able to understand different factors affecting	
	equilibrium	
	CO7: Students will be able to understand equilibrium	
·		
	CO1:Alcohols, their classification and nomenclature	
CH: 202 Organic and	CO2:Different methods of preparation and reactions of alcohols	
inorganic chemistry	CO3: Different methods of preparation and reactions of phenols.	
	CO4: Different methods of preparation and reactions of ethers	

Class: SYBSC

	CO1: Explain the principles of electrode processes and apply them
CH- 401	during Practical's.
Physical and Inorganic	CO2:identify and write different types of equilibria of an electrolyte in
Chemistry	solutions
	CO3:Third law of thermodynamics and its applications
	CO1: The course furnishes knowledge of Organometallic compounds of some important transition metals and their applications.
CH - 402 Organic and Inorganic	CO2: Study of transition metal complexes in organic synthesis.
Chemistry	CO3: Learn about MOT to draw energy diagrams and to predict bond order.
	CO4: Learn about the VBT to describe the formation of covalent bonds in terms of atomic orbital overlap.
CH-404 SEC-2: Advanced	CO1:Compare the Instrumental methods and non instrumental methods and there advantages
Analytical Chemistry	CO2: Solve the problem of detection and separation using analytical instruments.
	CO3:Students will be able to explore new areas of research in both chemistry and allied fields of science and technology

Class: TYBSC

	CO1: After successful completion of this course, students are
	expected to: Analyze the rotational spectra of diatomic molecules
	and determine the bond length.
CH-601	CO2:Explain and apply the radioactivity principles for various
Subject- Principles of	chemical and biological investigations
Physical Chemistry-II	CO3:Describe the mechanism of fluorescence, phosphorescence and
	photochemical reactions
	CO4:Analyze the given crystal structure and determine the indices
	of planes, inter- planer distances and type of crystal structure
CH 602 Subject Inorganie	CO1:Learn about basic principles and synthesis of nanomaterials
CH-602 Subject-Inorganic Chemistry	CO2:Learn about classification, composition and processing of
Chemistry	cement
	CO3:Learn about classification and composition of alloys
	CO1: Students will learn interaction of radiations with matter. They
	will understand different regions of electromagnetic radiations. They
	will know different wave parameters.
CH-603	CO2: Students will learn principle of mass spectroscopy, its
Subject- Spectroscopic	instrumentation and nature of mass spectrum.
Methods of Structure	CO3: Students will understand principle of UV spectroscopy and
Determination	nature of UV spectrum. They will learn types of electronic excitations
	CO4: Students will be able to calculate maximum wavelength for
	any conjugated system. And from the value of λ -max they will be
	able to find out extent of conjugation in the compound.
	able to find out extent of conjugation in the compound.
	CO1: Describe the industrial production of a number of important
	organic and inorganic compounds / chemicals and products of end
	use.
	CO2:Gain comprehensive knowledge of cutting-edge developments
CH-604 Subject-	in a field of different chemical industries
Chemistry of Industrially	CO3: Importance of Cosmetics Industry and a general study
· ·	including preparation and uses of the Hair dye, hair spray, shampoo,
Important Products	suntan lotions, lipsticks, talcum powder, nail enamel, creams (cold,
	and shaving creams).
	CO4:Perfumes and identify the distinguishing features of its
	COM citatines and identity the distinguishing features of its

	components and also an essential oils and their importance in cosmetic industries with reference to Eugenol, Geraniol, sandalwood oil, eucalyptus, rose oil, 2- phenyl ethyl alcohol, Jasmone, Civetone, Muscone etc. CO5:Know about pesticides both natural and synthetic, benefits and adverse effects of it, also synthesis, manufacture and uses of pesticides viz. Organochlorines (DDT, Gammexene,); Organophosphates (Malathion, Parathion); Anilides (Alachlor and Butachlor).
CH-605 Subject- Analytical Techniques	CO1:To provide knowledge of instruments which are used in Chemical, Pharma, Petroleum, and insecticide and pesticide industry CO2: To increase student technical skill as per industry need. CO3: To develop an understanding of the range and uses of analytical methods in chemistry. CO4: Compare the Instrumental methods and non-instrumental methods and there advantages. CO5: Students will be able to explain why chemistry is an integral activity for addressing social, economic, and environmental problems.
CH-606(A) Subject- Polymer Chemistry	CO1:Define terms like monomer, polymer, polymerization, polydispersity index, etc., classify polymers based on their origin, native backbone chain, and thermal response CO2: Know glass transition temperature and its determination, various ways to express molecular weights of polymers and polydispersity index. CO3: Identify different mechanisms of polymerizations viz. free radical, ionic, and condensation polymerizations.

Class: MSC I

	CO1:Differentiate between the nature of chemical bond concept
	from MOT and VBT
CH-421 : Advanced	CO2:Students will be able to apply the Approximate quantum
Physical Chemistry-II	methods for simple conjugated systems
	CO3: Students will be able to explain the mechanism of
	spectroscopic methods and solve the numerical problems related
	with it.
	CO1:Students can understand various reactions and rearrangements
CH-423 : Advanced Organic Chemistry-II	CO2:Understand and write mechanism of reactions and their
	applications
	CO3:Understand how to convert one molecule into another
	molecule by using oxidizing and reducing agents
	CO4: Plan the fundamental organic reactions of significance for
	organic synthesis and design synthesis of organic molecules.
	CO1:This course provides detailed information of ionic solids,
СН-426-А:	examples with their structures and calculation of radius ratio w. r. t.
Advanced Inorganic	C. N. 3, 4, 6.
Chemistry-I	CO2:This course offers to impart the basic knowledge about
Chemisti y-i	spectroscopy of inorganic compounds
	CO3:This course also offers to study the reaction mechanism in
	transition metal complexes

Class: MSC II

CH-450: Chemistry of Natural Products	CO1: To study the important features of terpenoids.	
	CO2: To study the biosynthesis of natural products.	
	CO3: To apply the knowledge of different reagents for synthesis of	
	natural product.	
	CO4: To understand the classification and uses of vitamins.	
•		
CH-451: Synthetic Methods in Organic	CO1:The students will be able to • Understand and apply the	
	specific protecting groups for the reactant to react the desirable	
	functional group	
	CO2: Design the synthetic pathway from target molecule by	
	applying the retrosynthesis, disconnection approach.	
	CO3: Understand various synthetic methods in organic synthesis.	
	CO4:Understand advanced organic reaction.	

CH-452(A): Drug Chemistry	CO1:Acquire knowledge on metabolism of biomolecules
	CO2: Familiarise with amino acids, proteins, lipids, nucleic acids and enzymes
	CO3: Understand biochemical reactions in microbial cells and metabolic pathway diversity

UG - B. Sc. (Computer Science)

	CO1: To do basic operations regarding
CS 101: Essential of Computer Science	CO2: To identify network type and analyze & comply basic
	issues in networking.
	CO3: To design an algorithm and draw the flowchart.
	CO4:.To study about networks and its type
	CO1:Understand basic Structure of the C-Programming,
	declaration and usage of variables
CS 102: C	CO2: Understand the concepts of various operators and
Programming-I	conditional statements.
	CO3: Understand array to store multiple pieces of homogeneous
	data.
	CO1:To study various data types, arrays and functions in C
CS LAB: DSC 1A LAB:	CO2:To understand input-output and, control and iterative
Lab Course on Essential	statements in C
of Computer and C	CO3:To study various data types, arrays and functions in C
Programming	
	CO1: Understand the idea of a digital world
CS 201: Internet	CO1: Understand the idea of a digital world CO2: Understand the importance of keeping safe online
Computing	CO2. Orderstand the importance of keeping safe online
1	CO1: Understand the concepts of functions and pointers.
CS202: C	CO2: Be able to work with operators and conditional statements
Programming-II	CO2. Be able to work with operators and conditional statements
COMP-211 :Data	CO1: Demonstrate an understanding og basic data structure
Structure – I	(Such as an array-based list, linked list, stack ,queue, binary
	search tree)and algorithms
	CO1: Use functions and pointers in your C++ program.
COMP-212:	CO2: Understand tokens, expressions, and control structures.
Programming in C++-I	CO3: Explain arrays and strings and create programs using
	them.
	CO4: Describe and use constructors and destructors.
	CO5: Understand and employ file management.
	Class: (T.Y.Bsc)Semester – V

CS-501System Programming CO2: To do basic system program like development of ed lexical analyzers etc CO3: Students are familiar with language processing activifunctions of translators, loader and linkers CS-502 Database Management System CS-502 Database Management System CS-503Software Engineering CO1: Students are able to perform the E-R Diagram, DFD, dictionary, Decision tree about software. CO2: They can also design the software in learned lang using the course content. CO3: Get the knowledge of types of testing & how testing the course content.	to— tion, t the Data uage
CS-502 Database CO2: Database CO2: Design E-R Model for given requirements and conversame into database tables. CO3: Students are able to perform the E-R Diagram, DFD, dictionary, Decision tree about software. CO3: Get the knowledge of types of testing & how testing database tables CO3: Get the knowledge of types of testing & how testing CO3: Students are familiar with language processing activities CO4: Students and linkers CO4: Student will be able to course, student will be able to co	to— tion, t the Data uage
CS-502 Database Management System CS-503Software Engineering CO3: Students are familiar with language processing activity functions of translators, loader and linkers On completion of the course, student will be able to consider the course of translators of translators, loader and linkers CO1: Solve real world problems using appropriate set, functional models. CO2: Design E-R Model for given requirements and convert same into database tables. CO3: Students are able to perform the E-R Diagram, DFD, dictionary, Decision tree about software. CO2: They can also design the software in learned language processing activity functions of translators, loader and linkers CO3: Students are familiar with language processing activity functions of translators, loader and linkers CO3: Solve real world problems using appropriate set, functional models. CO2: Design E-R Model for given requirements and convertions are into database tables. CO3: Students are able to perform the E-R Diagram, DFD, dictionary, Decision tree about software. CO3: They can also design the software in learned language processing activity functions of translators, loader and linkers	tion, t the Data uage
CS-502 Database Management System CS-503 Software Engineering CO2: Design E-R Model for given requirements and conversame into database tables. CO2: Design E-R Diagram, DFD, dictionary, Decision tree about software. CO2: They can also design the software in learned langusing the course content. CO3: Get the knowledge of types of testing & how testing the course content.	tion, t the Data uage
CS-502 Database Management System CS-502 Database Management System CO2:Design E-R Model for given requirements and conversame into database tables. CS-503Software Engineering CO3: Students are able to perform the E-R Diagram, DFD, dictionary, Decision tree about software. CO2: They can also design the software in learned langusing the course content. CO3: Get the knowledge of types of testing & how testing in the software in the software in learned langusing the course content.	t the Data uage
CS-502 Database Management System CO1:Solve real world problems using appropriate set, functional models. CO2:Design E-R Model for given requirements and conversame into database tables. CS-503Software Engineering CO1: Students are able to perform the E-R Diagram, DFD, dictionary, Decision tree about software. CO2: They can also design the software in learned langusing the course content. CO3: Get the knowledge of types of testing & how testing the course content.	t the Data uage
Anagement System and relational models. CO2:Design E-R Model for given requirements and conversame into database tables. CS-503Software Engineering CO1: Students are able to perform the E-R Diagram, DFD, dictionary, Decision tree about software. CO2: They can also design the software in learned langusing the course content. CO3: Get the knowledge of types of testing & how testing the course content.	t the Data uage

using the course content. CO3: Get the knowledge of types of testing & how testing.	
CO3: Get the knowledge of types of testing & how testing	
	1g 1s
performed in industry.	0
CO1:Differentiate between interactive and non-interactive	ctive
graphics.	
CO2:Study line Drawing and Circle Drawing techniques	and
CS-504 Computer Aided algorithms.	
Graphics CO3:Perform 2D and 3D transformation on different images	5.
CO4:Know about detail working of 2D and 3D clipping	and
windowing.	
CO4:Understand raster graphics and hidden surface eliminate	ion.
CO1:Explain basic principles of Python programming langu	age
CS-505 Python CO2:Construct and apply various filters for a specific task.	
Programming CO3:Apply the best features of mathematics, engineering	and
natural sciences to program real life problems.	
CO1:Get knowledge of JDK environment	
CO2:Explore polymorphism using method overloading	and
method overriding	
CS-506B JAVA CO3:Understand the different aspects of hierarchy of cla	isses
Programming I and their extensibility	
CO4: Understands the concept of streams and files	
CO5:Write programs for handling run time errors u	sing
exceptions	

	CO1:Understanding Graphics Concept Practically
DSC UG-CS-508: LAB on Computer Aided Graphics	CO2: Hands on of using standard graphics library
	CO3: Hands on of implementation of DDA, Bresenham's
	Line, Circle Drawing Algorithm
	CO4: Hands on of implementation of 2D Transformation:
	Translation, Scaling and Rotation
	· · · · · · · · · · · · · · · · · · ·
	CO5: Hands on of implementation of Cohen-Sutherland line
	clipping algorithm
	CO1:Get knowledge of JDK environment
	CO2:Explore polymorphism using method overloading and
	method overriding
	CO3:Understand the different aspects of hierarchy of classes
CS-509B: Lab on JAVA	and their extensibility
Programming I	CO4:Understands the concept of streams and files
	CO5:Write programs for handling run time errors using
	exceptions
	exceptions
Semester –VI	
Semester vi	CO1: Students should familiar with Operating System Services.
	CO2: Understand CPU scheduling algorithms, memory
CS-601 Operating	Management Techniques, Disk Drum Scheduling algorithms,
System	Deadlock preventions and avoidance.
	CO3:Introduction to android operating systems – its
	architecture, applications and uses
	drenicecture, approacions and uses
	On completion of the course, student will be able to—
	CO1:Design E-R Model for given requirements and convert the
	same into database tables.
CS-602 Relational	CO2:Use database techniques such as SQL & PL/SQL.
Database Management	CO3:Explain transaction Management in relational database
Systems	System.
	CO4:Use advanced database Programming concepts
	After completion of the course:
	CO1: Students understand the information exchange done
GG (02 G	across the network with the help of OSI & TCP/IP models.
CS-603 Computer	CO2: Student understands how errors are captured & handled in
Network	network.
	CO3: Student understands various attack & its prevention
	techniques.
CS-604 Theoretical	CO1: Understanding the use of Sets, Relations and Graphs.
Computer Science	CO2: Understand Languages in TCS.

	CO2 I . 1 .: CD 1 I . 1E .:
	CO3: Introduction of Regular Languages and Expressions.
	CO4: Understanding Pumping Lemma and its applications.
	CO5: Explore the knowledge of Pushdown Automata.
	CO6: Understanding Normal Forms with Examples.
	CO7: Understanding Turing Machine.
	CO1:Explain basic principles of Python programming language
	CO2: Implement object oriented concepts, database
	applications.
CC (OF D. 4)	CO3: Construct regular expressions for pattern matching and
CS-605 Python	apply them to various filters for a specific task.
Programming – II	CO4: Design and implement Database Application and Content
	providers.
	CO5:Apply the best features of mathematics, engineering and
	natural sciences to program real life problems
	CO1: Program using graphical user interface with Swing classes
CS-606B: JAVA	CO2:Create programs using menus and dialog boxes
Programming II	CO3:Understand advanced java concepts like JDBC, Java
	Beans
	CO4: Handle different kinds of events generated while handling
	GUI components
	CO5: Program to create applets
	CO1: To use SQL & PL/SQL.
CS-Lab 608: Lab on	CO2: To perform advanced database operations.
RDBMS	CO3: Create database tables in postgreSQL.
	CO4: Write and execute simple, nested queries
	CO5: To use SQL & PL/SQL.
	CO1: Program using graphical user interface with Swing classes
	CO2: Handle different kinds of events generated while
	handling GUI components
	CO3: Create programs using menus and dialog boxes
CS-509 B: Lab on JAVA	CO4: Program to create applets
Programming II	CO5: Program using graphical user interface with Swing classes
	CO6: Handle different kinds of events generated while handling
	GUI components
	CO7: Create programs using menus and dialog boxes
	CO8:Understand advanced java concepts like JDBC, Java Beans
	CO1: To do basic operations regarding
CS 101: Essential of	CO2:To identify network type and analyze & comply basic
Computer Science	issues in networking.
*	CO3:To design an algorithm and draw the flowchart.

	CO1: Understand array to store multiple pieces of homogeneous
	data.
CS 102: Programming in	CO2: Understand the concepts of functions and pointers.
C-I	
	CO3:Be able to work with operators and conditional statements
	PG Computer Science-
	M.Sc. (Computer Science)
	CO1: Student will be able to choose appropriate data structure
	as applied to specified problem definition
	CO2: Students will be able to use linear and non-linear data
Data Structures and	structures like stacks, queues, linked list etc.
Algorithms	CO3: To increase the student's intuitive understanding of search
Algorithms	trees
	CO4: To learn advanced tree data structures
	CO5: To learn to represent data using graph data structure
	CO6:Students will be able to apply concepts learned in various
	domains like DBMS, compiler construction etc.
	CO1:To analyze Database design methodology.
	CO2: Acquire knowledge of fundamentals of Database
	Management System.
CS-102 Database	CO3:Analyze the difference between traditional file system and
Management System	DBMS.
(DBMS)	CO4:To deal with different Database languages.
	CO5:Draw various data models for Database, writing and
	executing queries to get expected results.
	CO1: Understand, design, construct, analyse and interpret
	Regular languages, Expression and Grammars.
CC 102	CO2: Design different types of Finite Automata and Machines
CS-103 Automata	as Acceptor, Verifier and Translator.
Theory and	CO3: Understand, design, analyse and interpret languages,
Computability	Expression and Grammars.
	CO4: Design different types of Push down Automata and
	Turing Machine.
	CO1: understand different types of operating systems.
	CO2: gain extensive knowledge on principles and modules of
	the operating systems.
	CO3: understand key mechanisms in the design of operating
CS-104 Operating	systems modules.
Systems	CO4: understand process management, thread management,
	memory management, file management and deadlock handling.
	CO5compare performance of different processor scheduling
	algorithms.
	CO6produce algorithmic solutions to process synchronization
	Soproduce argentanine solutions to process synchronization

	muchloma
	problems
	CO7understand the issues related to protection and security
	CO1:To understands the fundamentals of Java programming language and its constructs.
CS-105 Object Oriented	CO2:To understand concept of object-oriented programming concept using Java.
Programming using JAVA	CO3:To implement the applications using the concept of the Inheritance, Interfaces, Lambda Expressions, and Inner Classes.
VIIVII	CO4:To design and implement the real-world application using the concept of the Exceptions and Generic Programming
	CO5: understand how to use concept of the Graphics Programming, Event Handling, Swing Components, and JDBC in their application.
	11
	Data Structures and Alg.
	CO1: Develop solutions for a range of problems using
	procedure oriented / object oriented programming.
	CO2: Apply divide and conquer strategy to searching and
	sorting problems using iterative And / or recursive solutions.
	CO3: Design scenarios to explain behaviors and demonstrate
	correctness of programs
	CO4: Determine which algorithm or data structure to use in
	different scenarios
	CO5: Choose the appropriate data structure and algorithm
	design method for a specified application.
CS LAB-I LAB on Data	CO6: Have practical knowledge on the applications of data
Structures and	structures
Algorithms and JAVA	JAVA programming
programming	r r r
	CO1:Write Java application programs using OOP principles and
	proper program structuring
	CO2:Implementing user interface: 2D shapes, events, dialog
	box, menu and popup menu
	CO3Developing Applets, multithreaded programs
	CO4:Implementing generic and JDBC programming
	CO5:Demonstrate the concepts of polymorphism and
	inheritance
	CO6: Write Java programs to implement error handling
	techniques using exception handling
CS LAB-II LAB on	CO1: To understand Database design methodology.
DBMS	CO2: Acquire knowledge in fundamentals of Database
	Management System.

	CO3: Work with popular Database languages.
	Co4:.Realise various data models for Database and Write
	queries in SQL.
	Co5: Familiar with basic database storage structures and access
	techniques.
	Understanding of basic structure of compiler, concepts and
	terminology in programming languages, lexical analysis, finite
CS-201 Compiler	state techniques, scanner generator, parsing, kinds of parsers,
Construction	designing lexical analyzer, scanner and parsers, principal ideas
	with intermediate code generation, optimizations.
	Understanding of all concepts essential to design compiler
	CO1:demonstrate their understanding of and apply methods of
	mathematics in computer science to subsequent courses in
CS-202	algorithm design and analysis
Mathematical	CO2: identify, formulate, and develop solutions to
Foundations of	computational challenges.
Computer Science	CO3: understand and solve a computational problem to meet
•	desired needs within realistic constraints.
	CO4: analyze the behavior of the data, model the data using
	statistical measures and represent it graphically on paper
	without using available computerized tools.
	CO5: apply mathematical foundations, probability theory in the
	modeling and design of computational systems in a way that
	demonstrates comprehension of the tradeoffs involved in design
	choices.
	Co1: Identify problems that are amenable to solution by AI
CS-203 Artificial	methods.
Intelligence	CO2: Identify appropriate AI methods to solve a given problem.
	CO3: Design smart system using different informed search /
	uninformed search or heuristic approaches.
	CO4: Apply the suitable algorithms to solve AI problems.
	CO1: Analyze the asymptotic performance of algorithms.
	CO2: Write rigorous correctness proofs for algorithms.
	CO3: Design and analyze divide-and-conquer based algorithms.
CC 204 Design and	CO4: Devise and Synthesize greedy and dynamic-programming
CS-204 Design and	based algorithms.
Analysis of Algorithms	CO5: Employ graphs to model problems solvable using
	traversal techniques.
	CO6:Able to model problems using backtracking
	CO7: Able to classify nondeterministic polynomial time
	algorithms.
CS-205 Python	CO1: understand the basic concepts of Python programming.
Programming	CO2:write Python programs that supports some constructs of
88	The problem in the popular constitution of

	functional programming like map, reduce, filter.
	CO3: understand the use of strings, lists, tuples, dictionaries,
	and files and able to manipulates data available within them
	with help of various functions.
	CO4: understand how to write user defined classes, methods as
	well as module creation and handle exceptions while
	implementing python programs.
	CO5:use regular expression for validating email address or
	domain name.
	CO1:Distinguish between, supervised, unsupervised and semi-
	supervised learning
	CO2:Apply the apt machine learning strategy for any given
CS-301	problem
Machine Learning	CO3:Suggest supervised, unsupervised or semi-supervised
	learning algorithms for any given problem
	CO4:Design systems that uses the appropriate graph models of
	machine learning
	CO1:Successful students will able to design web applications
CS-302 Web	using ASP.NET
Application	CO2:Successful students will be able to use ASP.NET controls
Development	in web applications.
Technology	CO3:Successful students will be able to debug and deploy
reemology	ASP.NET web applications
	CO4:Successful students will be able to create database driven
	ASP.NET web applications and web services
	CO1: Developed scientific and strategic approach to solve
	complex problems Computer in the domain of Computer
	Graphics and Digital Image Processing.
	CO2: Demonstrated various algorithms for scan conversion and
	filling of basic primitives objects and their comparative analysis
CS 303 Computor	and applied 2-D and 3-D geometric transformations, viewing
CS-303 Computer	
Graphics and Digital	and clipping on graphical objects.
Image Processing	CO3: Built the mathematical foundations for digital image
	representation, image acquisition, image transformation, image
	enhancement and restoration.
	CO4: Developed a theoretical foundation of fundamental
	concepts of digital image processing.
	CO5: Exposed students to MATLAB Image Processing
	Toolbox.
CS-304 Software	CO1:Understand and demonstrate basic knowledge in software
Engineering	engineering
Engineering	CO2: Define various software application domains and

	I mamamban different musaga madal yand in softwan
	remember different process model used in software
	development.
	CO3: Explain needs for software specifications also they can
	classify different types of software requirements and their
	gathering techniques.
	CO4:Convert the requirements model into the design model and
	demonstrate use of software and user interface design
	principles.
	CO5: Distinguish among SCM and SQA and can classify
	different testing strategies and tactics and compare them.
	CO6:Justify role of SDLC in Software Project Development
	CO7:Generate project schedule and can construct, design and
	develop network diagram for different type of Projects.
	CO1: Students will get idea about know-hows, issues and
	challenge in Natural Language Processing and NLP applications
	and their relevance in the classical and modern context.
	CO2:Student will get understanding of Computational
CS-305 (A) Natural	techniques and approaches for solving NLP problems and
Language Processing	develop modules for NLP tasks and tools such as Morph
0 0	Analyzer, POS tagger, Chunker, Parser, WSD tool etc.
	CO3:Students will also be introduced to various grammar
	formalisms, which they can apply in different fields of study.
	CO4:Students can take up project work or work in R&D firms
	working in NLP and its allied areas
	CO1: write about OR and decision making.
	CO2: Differentiate between feasible and optimal solution
CS-305 (B) Optimization	CO3: Apply solving techniques to all types of LPP.
Algorithms	CO4: Apply solving techniques to an types of E11.
	theory problems as well.
	· ·
CS-305 (C) Data	CO2.Differentiate between OLTAP and OLAP
Warehousing and	CO2:Differentiate between OLTAP and OLAP
Data Mining	CO3:Apply data pre-processing techniques
(DWDM)	CO4:Write basic algorithms for extracting patterns from data
, ,	(association mining, classification and clustering)
	CO5:Solve problems related with various aspects of data mining
	CO1: Students will get hands-on experience on basic concepts
CS LAB-V LAB on	in web applications development using ASP.NET technology.
Web Application	CO2:Students can develop or undertake professional looking
Development	real life web sites using ASP.Net technology.
Technology	CO3:It will help students to grasp other Web Application
1 connoingy	Development technologies/platforms easily through learn-by-
	comparison approach so that the learning curve will be smooth
	and faster.

	CO1: Developed scientific and strategic approach to solve
	complex problems Computer in the domain of Computer
	Graphics and Digital Image Processing using C++ and
	MATLAB respectively.
I AD on Commuton	CO2: Implemented various algorithms for scan conversion and
LAB on Computer	filling of basic primitives objects and their comparative analysis
Graphics and Digital	and applied 2-D and 3-D geometric transformations, viewing
Image Processing	and clipping on graphical objects.
	CO3Exposed students to MATLAB and Image Processing
	Toolbox.
	CO4:Used various tools in MATLAB to implemented image
	transformation, image enhancement in spatial and frequency
	domain.

Class: F.Y. B.Sc. (2018-19)

	CO1: Apply knowledge to develop circuits using electronic
ELE-101:Network	devices.
Analysis And Digital	CO2: Apply the concept and knowledge of electronics devices to
Integrated Circuits	real life problems.
	CO3: Simulate complex circuits and understand the behavior of the
ELE-102: Digital	systems.
Integrated Circuits	CO4: Understand and analyze, linear and digital electronic circuits.
	CO5: Review, prepare and present technological developments.
	CO1: Apply the concept and knowledge of integrated circuit chips
DV D 404 4 1	to develop new systems.
ELE-201: Analog Electronics	CO2: Apply practical knowledge to solve real life problems of the
Electronics	society.
ELE-202: Linear	CO3: Understand of the course and create scientific temperament
Integrated Circuits	and give exposure to the students for independent use of integrated
	circuit chips for innovative applications.
	CO4: Model complex circuits and simulate them.
	CO5: Handle simulation software to analyze electronics circuits.

Class: F.Y. B.Sc. (2022-23)

	CO1: Apply knowledge to develop circuits using electronic
ELE-101: Circuit	devices.
Components and Network	CO2: Apply the concept and knowledge of electronics devices to
Analysis	real life problems.
·	CO3: Simulate complex circuits and understand the behavior of the
ELE-102: Basics of Digital	systems.
Electronics	CO4: Understand and analyze, linear and digital electronic circuits.
	CO5: Review, prepare and present technological developments.
	CO1: Apply the concept and knowledge of integrated circuit chips
	to develop new systems.
ELE-201: Analog	CO2: Apply practical knowledge to solve real life problems of the
Electronics	society.
	CO3: Understand of the course and create scientific temperament
ELE-202: Digital Circuits	and give exposure to the students for independent use of digital
	integrated circuit chips for innovative applications.
	CO4: Model complex circuits and simulate them.

Class: S.Y. B.Sc. (2019-20)

	CO1: Apply knowledge to develop circuits of analog modulation and demodulation.
	CO2: Apply the concept and knowledge of microprocessors to real
ELE-301: Analog Communication	life problems.
	CO3: Analyze modulation circuits and understand the behavior of
ELE-302: Microprocessors and Applications	the systems.
• • • • • • • • • • • • • • • • • • • •	CO4: Understand and analyze 8085 microprocessor and its
	programming.
	CO5: Review, prepare and present technological developments.
	CO1: Apply the concept and knowledge of digital communication to
	develop new systems.
	CO2: Apply practical knowledge of microcontrollers to solve real
ELE-401: Digital Communication	life problems of the society.
Communication	CO3: Understanding of the course and create scientific temperament
ELE-402:	and give exposure to the students for independent use of
Microcontrollers and Applications	microcontroller for innovative applications.
rippications	CO4: Gain knowledge of microcontroller programming.
	CO5: Handle hardware and software to shoot problems of the
	society.

Class: S.Y. B.Sc. (2022-23)

	CO1: Apply knowledge to develop analog circuits and use for
ELE-301: Analog Circuits	different applications.
and Applications	CO2: Apply the concept and knowledge of microprocessors to real
	life problems.
ELE-302: Microprocessors	CO3: Understand and analyses 8085 microprocessor and its
and Applications	programming.
	CO4: Review, prepare and present technological developments.
	CO1: Apply the concept and knowledge of analog modulation and
ELE-401: Analog	demodulation.
Communication	CO2: Understand the analog communication to develop new
ELE-402: Linear	systems.
Integrated Circuits &	systems.
Applications	CO3: Apply practical knowledge of integrated circuits to solve real

life problems of the society.
CO4: Understanding of the course and create scientific temperament and give exposure to the students for independent use linear integrated circuits.
CO5: Handle hardware and software to shoot problems of the society.
